Your Submission:	<p>Rates & Other Matters.</p> <p>At the recent Committee Meeting of the Central Riccarton Residents' Association, it was unanimously resolved that the City Council should ensure that the level of rates this year should in no circumstance exceed the level of inflation. If necessary projects such as the exorbitantly high priced Council Building should be deferred, or even cancelled.</p> <p>It was further resolved that before any consideration regarding the fluoridation of our water supply be considered, a full consultation with experts both here and overseas, and residents should take place. We are concerned at the conflicting reports which are circulating at present, and would strongly oppose any unilateral proposal to fluoridate our water without adequate investigation, and safeguards being in place to ensure that those residents who choose to use fluoride tablets are not subject to poisoning by fluoride! The amount of sodium fluoride needed for a fatal dose is very small indeed.</p> <p>Keith Derbyshire Chairperson</p>
