<b>Your Submission:</b>	<p>Everything in my submission applies to Section 2 of the plan.</p> <p><b>City Development:</b> I feel that Sustainability and Environmental Protection should get much more funding than, say, Heritage Protection, considering the threats of Global Climate Change and (after) Peak Oil, which will affect us very seriously if we don't prepare for it now.</p> <p><b>Refuse Minimisation and Disposal:</b> I appreciate it that a large proportion of the budget has been allocated to MINIMISATION!!</p> <p><b>Streets and Transport:</b> It says:"...increasing attention is being given to pedestrians, cyclists and public transport". I applaud this and want to emphasise the importance of this.</p> <p><b>Water Supply:</b> In order to achieve the desirable water use reduction I would like our water consumption to be metered and charged accordingly.</p>
