Your Submission:

As an employee in the hospitality industry working in the City Mall and areas, I am engaging with a lot of visitors to our City who complement us on the fact that we have the tram as an attraction. They also do say however that perhaps it would be better if it went to more places and gave them a better overall picture of the environment. Extending it will be a great way of showcasing the City to our visitors and will be yet another attraction we can offer. I also feel that it will be good to be able to promote what is basically a clean transportation system in that there are very few emissions from the electric trams. Perhaps in the future consideration could be given to extending the system round the City as a viable local transport system for all.
