

6. A & P SITE (CANTERBURY PARK) UPDATE

Officer responsible Parks and Waterways Manager	Author Rod Whearty, Parks and Waterways Area Advocate, DDI 372-2510
Corporate Plan Output: New Reserve Developments	

The purpose of this report is to give the Board a progress report/update on some of the preliminary development options for the old A and P site (off Curletts Road), following Council purchasing the site some months ago. The report also contains a recommendation to establish a "Liaison Committee" comprising of 3 members from the Riccarton/Wigram and Spreydon/Heathcote Community Boards.

INTRODUCTION

Board members will probably be aware that the Council recently purchased a substantial area of land formally owned by the A and P (Agricultural and Pastoral Association) off Curletts Road. The former A and P site had boundaries adjoining both Nga Puna Wai and Templetons Road Reserve. Purchase of the A and P site has provided a significant Open Space extension to the area as well as providing a continuous connection that links the two previously existing reserves.

The total area (including the 2 previously existing reserves) now comprises of some 145 hectares (358 acres) encompassing an area bounded by the Heathcote River, Curletts Road, and Wigram Road down to the boundary of Aidenfield and Musgroves Ltd.

EXPRESSIONS OF INTEREST

Over the past few months there have been a number of groups or organisations expressing an interest in the site, such as "Riding for the Disabled", which the Board is already aware of. The Parks and Waterways Unit and City Solutions staff are working their way through these expressions of interest assessing them to see if they are able to be accommodated on the site as well as their suitability and appropriateness to the site.

COMMUNITY BOARD BOUNDARY

The boundary between the Wigram Ward and the Spreydon Ward runs directly through the site. The bulk of the site is physically located within the Wigram Ward, however the bulk of the residential community adjoining the site is located within the Spreydon Ward. The current residential imbalance will level out somewhat over the next few years as the Aidenfield residential development (Wigram Ward) progresses at the southern end of the site.

Given the current location of the Ward boundaries the Parks and Waterways proposes to establish a joint Liaison Committee comprising of 3 members from each Board. The reason for this is to assist with achieving continuity with the development and to avoid the potential for the Boards to formulate differing resolutions on an application or issue.

Boards now have the authority to grant leases on reserves under the new delegations granted to Boards by Council. Applications for leases on this site may be granted by either Board depending on the exact location of the leased area. It is also possible in some cases that both Boards may grant approvals for different parts of the same application. For example, one Board may grant a lease for the building area and because the outdoor area may fall into another Boards area then they would grant the lease for that.

Therefore it is essential that both Boards have a close working relationship to ensure continuity in regard to any development proposals or initiatives for this site, which is why we would like to establish a joint committee.

PRESENTATION

Dennis Preston (Senior Landscape Architect) and Phillip Millar (Landscape Architect) with the City Solutions Unit will give a presentation/update to the Board regarding current development proposals and initiatives for the site. Aerial photographs and site plans will be tabled at the meeting to help familiarise board members with the site.

Recommendation: That the Riccarton Wigram Community Board appoint 3 members to represent the Board on the A and P Liaison Committee.

Chairperson's Recommendation: That the Community Board be represented by Ken Cummings, Neville Bennett, and Mike Mora on the A & P Liaison Committee.
