

4. PROPOSED KERB AND CHANNEL PROGRAMME – SHIRLEY/PAPANUI

Officer responsible City Streets Manager	Author Ken Stevenson, 941-8555
--	--

The purpose of this item is for the City Streets Unit to present, for consideration, the proposed five year kerb and channel programme.

Members will recall that the new prioritisation process involves a step where Community Boards can reprioritise streets within their area within the years two to five of the programme.

The attached programme includes key points and reasons for decisions made. The Board is now asked to consider any changes they wish to make. Regarding budget and length restraints, there is a column in the spreadsheet indicating the length of the street. Board members should note that if projects are swapped they need to be of similar length. Proposed changes will need to be reported back to the City Streets Unit by 5 December 2003.

Staff

Recommendation: The Board consider the kerb and channel prioritisation for the Shirley/Papanui area and make any changes.
