

9. TUCKERS ROAD

Officer responsible City Streets Manager	Author Paul Burden, DDI 9418836
--	---

The purpose of this report is to seek two delegates from the Board to join the Tuckers Road Project Team, agree on the process and to launch the "Tuckers Road – Your Road – Your Choice" leaflet.

Members will recall the planned event for Tuckers Road occurring from 10 – 13 November (refer attached report). The proposed street design process (Charrette) would benefit from having representatives from this Board on the Project Team. Other members of the team will include a traffic designer, landscape architect, safety auditor, LTSA and Police representatives, residents' representatives and school representatives. The team will come together on 12 and 13 November to work on the design of Tuckers Road and will operate from a site office. As discussed the design process will compliment the preceding two days of seminars and working with Northcote School. Team members are encouraged to participate in the activities over the full four days but essentially need only be available for the two days of the charrette.

It should be noted that this process is a condensed version of a typical planning process used for City Streets capital works projects. As such the opportunities for getting Board sign off to the options and ideas are very limited. This process carries with it the expectation that there will be Board support for the levels of consultation and the options that emerge without official reporting. However the final scheme plan that emerges at the end of the four days will be reported to all members through the normal channels.

The "Tuckers Road – Your Road – Your Choice" leaflet (attached) is to be distributed to the local community shortly. An offer by some members to take part in the distribution of the leaflet is gratefully accepted. It is proposed to distribute the leaflet in the area bounded by Main North Road, Northcote Road, Cavendish Road and Sturrocks Road.

Staff

- Recommendations:**
1. That the Board support the proposed "charrette" process for the Tuckers Road project.
 2. That the Board appoint two members to be part of the Tuckers Road design team.
 3. That the Board support the publicity leaflet and the distribution area described above.

Chairperson's

- Recommendations:**
1. That the staff recommendation be adopted.
 2. That two Papanui members be appointed and that any other Board members be encouraged to attend.
