**CHRISTCHURCH CITY COUNCIL  
Nunweek Park Proposed Third Turf  
Grant of Lease Submission**

Please provide the personal details below or your submission will not be considered by the Council

YourName: \_\_\_\_\_ Hamish Aitken \_\_\_\_\_

Contact Address: 133 Mays Rd St Albans ChCh \_\_\_\_\_

Postcode: \_\_\_\_\_ 8012 \_\_\_\_\_ Phone (Daytime): \_\_\_\_\_ 3555 751 \_\_\_\_\_

Alternative Phone (Evening or Mobile): \_\_\_\_\_

Email (if applicable): \_\_\_\_\_ Hamish.Aitken@xtra.co.nz \_\_\_\_\_

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

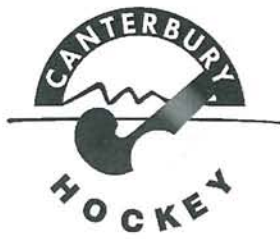

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

Christchurch has 3 turfs – 1 turf for every 127000 people. Invercargill have a turf per 25,000 people, Timaru has 1 turf per 12500 people.

New Zealand over achieve in Hockey with mens and womens teams being in the top 4 in thw orld. Canterbury under achieves in hockey when you look at provincial size and participation in the game and NZ selections. The lack of turfs are a factor in this.

Because of the limited turfs

- Players including school children must play and practice from 8.00am in the morning to 8.30 pm at night
- We do not have an international quality turf so cannot attract the local spending that eg Invercargill attracts from tournaments
- We cannot expand our sport as there is nowhere to play so the choice to play hockey is being denied – we are so short of grounds not just a little bit.
- Practice times on turfs are limited – typically 1 hour per week at the most for only senior teams
- The Marist turf is reserved for the Marist Club and St Bedes for all the best practice times – fair enough they contributed but it leaves the rest of the hockey community with only 2 turfs for practice at the best times.
- CCC pour money into rugby stadiums that do not get filled and utilised except for the benefit of people outside the city at test match time. Hockey uses its facilities to a very high level
- We expect CCC to support diversity of recreational opportunities not just rugby and cricket

Attention: Joanne Walton

Dear Joanne

**Re: Nunweek Park – Third Hockey Park**

With regards to the proposal for the Council to grant a ground lease to the Canterbury Artificial Surfaces Trust to construct a third artificial surface hockey turf we have no objections to this and in fact support it.

As a neighbour to the hockey grounds we have always found them to be responsible. The area has always been kept neat and tidy and we have never had issues to complain.

After the recent earthquakes in June they also assisted with parking for students from Canterbury University who were using part of the Tait premises for their lectures so they have a very good community spirit and have always been accommodating when approached..

They have our full support in this application.

Regards,

**ROBERT & RHONDA UPTON**

3 January 2012,

**PROPOSED LEASE FOR THIRD HOCKEY TURF**  
**NUNWEEK PARK**

I wish to make the following submission regarding the proposed lease for a 3<sup>rd</sup> artificial hockey ground at Nunweek Park. I do not wish to be heard in support of my submission

I am concerned that if the proposed lease was to be approved I will be denied access to over 10% of Nunweek Park as I am not a member of a Hockey Club. Further, if the proposal is approved, I am concerned about:

- The noise and light interference to some nearby residents especially when the fields are utilized at night.
- The danger and congestion caused by an increased volume of traffic on Wooldridge Road.
- Lack of off street parking for the associated increased number of participants (players and spectators).
- Potential water runoff from the artificial surfaces.
- The loss of established trees in the area.
- The adverse visual impact of high fences and lighting poles.

Re Reduced Public Access to Nunweek Park

Attention Joanna Walton  
Consultation Leader,  
Capital Programme Group

As the joint owner with my wife to the property at 4 Talisker Place we feel that we must make the following submissions regarding the denial of access to portions of Nunweek Park to the general public. Nunweek Park is a well used facility by the general public and any denial of access to a public amenity must be strongly opposed. The park has all manner of sporting codes using its facilities and the fencing off and denial of access to all but a few members of one sporting code is a completely wrong. While we can accept that the sport could be dangerous to the general public if the area is not enclosed the Hockey Association is prioritizing itself in having 18% of the total Nunweek Park area. Already the Hockey Association has complete authority over the area already fenced and this is just a further denial to the general public who's rates have developed and maintained this area.

1. As our property would be the closest to the whole hockey complex the noise and light interference from an expanded facility would detract from our properties value and affect any resale. To have a further 8 unsightly light towers would destroy an already delightful park area and the trees to the north of the property shield the unsightly stands and high perimeter fence. While we have not been at our property during the peak winter months, when the lighting would be at its peak useage, the times that it have been used while we have been at the property does create a problem. A further 8 lighting towers would create a greater light pool that will affect the other occupants.
2. The loss of trees along the northern boundary would also make the current facilities far more visible on an all ready busy road. The Council have not maintain the trees properly on the park boundary closest to our property and we feel that there should be no loss of trees, but a more active programme be adopted to keep the trees within the park to a reasonable height and use natures landscape to soften the impact of an already unsightly complex.
3. The addition of a 2.4m high fence plus additional high ends will convert an area that is quite eye pleasing into a visual high security detention type facility. This is not

what a public park with trees and grassed areas should be turned into and it would be a travesty of justice if the Council allowed the Hockey Association to proceed.

4 Already the security fence that is in place at the western and southern boundary takes over from the area that is leased by the Hockey Association restricting the walkway around this area and creating in the winter an extremely treacherous walking track. While it is understood that this area is to be landscaped and improved it is just another area that has been allowed to deteriorate as the current facilities hide this part of the park and it has been neglected.

5. The parking facilities are inadequate already and further expansion of the hockey grounds can only make the situation worse. The road is currently quite narrow and when cyclists and cars are moving along Woolridges Road they are confronting a dangerous situation. If there is greater areas providing for increased usage it will not be long before a fatality or severe accident will occur.

Both my wife and I are extremely concerned at this new proposal and will vigorously oppose any extension to the present facilities. Christchurch is famous for its large green areas, beautiful trees and freedom for its citizens to exercise and enjoy these facilities. They must not be closed off to a few individuals to enjoy their recreation denying others their right to enjoy this beautiful park. The creation of high security fences denies the ratepayers a marvelous facility and destroys the feeling of open space for all.

Yours faithfully  
P. J. and U. J. Gooby

Dear Joanne

My email can be a written submission thank you. I am concerned about the trees, which outwardly do not appear to be in decline, particularly the large one facing north of the latest turf, i.e. it is behind the goal area.

Regards Sandra

**To:** sandra  
**Subject:** RE: Nunweek Park Issue

Thank you for bringing this to our attention Sandra.

I have had confirmation from Canterbury Hockey that the comment in the Press article about the '4th turf' has been misquoted. The comments should have been about a 4th and 5th turf, which relate directly to the replacement of Porritt Park, and are required to be in another location. Canterbury Hockey confirm that they have never anticipated these would be in Nunweek Park.

It is my understanding that the trees have been marked to enable their identification (as needing to be removed) on the landscape plans for the proposed development. Permission will be required from the Fendalton Waimairi Community Board to remove these otherwise healthy trees if they make a decision to approve the lease.

Can I please confirm with you whether your email is intended to be a written submission on the proposal, or is only seeking information at this stage?

Regards

**Subject:** Nunweek Park Issue

Dear Joanne

An article in this morning's Press concerned me (along with issues raised at the December meeting). Chairman Selwyn Maister intimated that " we have had our focus largely on getting another turf at Nunweek Park and now getting another turf there and a fourth one rapidly."

At the December meeting the management who attended emphatically stated that there would not be any more turfs put in place at Nunweek with a question mark over the proposed third turf. You heard that as we all did. This must not come to bear!

Beautiful trees that have been marked with pink spots should not be taken down either as

the trees planted in this lovely park enhance the beauty and I would dare to say that most people who walk through here on a daily basis would not want these trees cut down.

I would ask that prudence, respect and common sense prevails.

Sincerely  
Sandra Woodham

**Re: Nunweek Park proposed third hockey turf**

I would like to object to the proposed lease of further ground to the Canterbury Artificial Surfaces Trust for another hockey field. I live on the Skyedale Drive/Talisker Place corner and object on the following grounds -

1. Loss of access to the park and access across to Wooldridge Road due to fenced area.
2. Inadequate parking despite council believing there will be sufficient - the existing carpark is often over full at peak times, with an increase in players and spectators I do not believe there will be enough parking which will lead to cars parked on our street.
3. Traffic congestion on Wooldridge Road during peak playing times.
4. Removal of existing trees.
5. Unsightly fencing on Wooldridge Road.
6. Noise and light disturbance. We are very close to the existing fields and can hear all current noise.

I have family members involved in hockey so do not object to hockey as a sport. In my opinion there are other places in Christchurch that could be used for this additional turf.

When we purchased our property we did so partly because of our park outlook. By having these turfs, lights and fencing we believe it is devaluing our property.

I sincerely hope the proposed turf does not go ahead.

Yours faithfully

Kate Watkins

Re Nunueek Park Proposed Lease to Canterbury  
Artificial Surfaces Trust.

This letter is to advise we are in support of  
the proposal to construct a third lit artificial  
hockey turf. It is far better to have children  
"young persons playing sport than "hanging  
around". The proposed tree removals + new  
landscaping along the Woolbridge Road frontage  
sound acceptable to us as well as the conditions  
re proposed lighting.

We can be contacted on (03) 3599 033 or  
027 619 8066 if required. L.M. Phillips

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

**There are several reasons why a third turf at Nunweek Park needs to be in place urgently – as soon as possible into the 2012 season.**

**On the back of the success of the Black Sticks Men’s and Women’s teams throughout the 2011 year Canterbury Hockey needs to be growing our sport in our community, primarily targeting children and youth.**

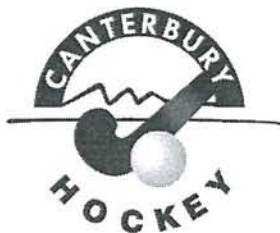

However a deterrent to helping with this growth is the time slots that these age groups are asked to play in. The “youth” grades are not particularly not enticing as they are at later time slots on Friday’s, Saturday’s and Sundays and for some of us, particularly in my catchment area, the trip home is a hazardous one at the best of times at the moment being “Easties!!”. No one wants to be getting their teenagers home late from sport on a Sunday night!!

As a result of a shortage of turfs several of the grades have had to have their playing times shortened to be able to fit the weekly matches in, we have been restricted as clubs as to training options so that all grades may play. Let’s face it who really wants to start a practice at 9.00pm? How may other sports face this each week?

Our representative teams are also severely restricted for training times and spaces which in the long term does affect the strength of the game in our province.

With limited playing times available on only three turfs we cannot grow our sport in any of the age groups or grades, Primary or Seniors. As a parent of a nearly 9 year old and coach the 8.00am time slots are killers.....plus the fight to get training times for our juniors at a respectable time to take into account that trip back East.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

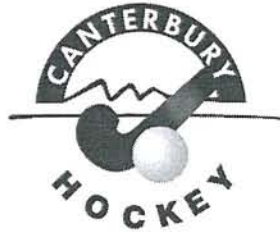

As the president of the University Hockey Club I am involved with large number of young Hockey players and university students. To us the Hockey turf is somewhere to play and practice to be active and relieve the stress from studying.

A third turf would mean better practice and game times currently we have shortened games and practices that may end later than 10.30pm. A third turf would allow more space to practice at a reasonable time and have games finishing earlier.

As part of scheduling and administrating a hockey club I know we need a minimum of five turfs to give people a proper chance to play hockey in Christchurch. We only have three one of which has limitations on the hours it can be used. We are already late in starting and if the turf is not accepted straight away we will have another season of only just finishing games at 10.30pm which puts people off playing and having fun as they need to get up and work in the morning.

This is an issue to us as some of our teams involve a large number of 18-19 year olds who are unfamiliar with Christchurch, who do not have vehicles and rely on cycling and buses for transport. Effectively we have at young girls in a poorly lit dark environment regularly every week either waiting for rides or walking to a bus stop at 10.30-11pm at night. From a safety aspect it is beneficial to our young girls to finish earlier so they can cycle and bus home safely.

I realize that there may be some impact on neighbors one of the students who plays in my club lives in one of the closest possible houses to the park. He lives there with his whole family and when I asked him and his family about the new park his exact comments were:

**CHRISTCHURCH CITY COUNCIL  
Nunweek Park Proposed Third Turf  
Grant of Lease Submission**

---

*"A little concerned with congestion as a whole, of more people and more cars, though kind of in both camps because I would like more hockey fields so we can get adequate training times and game time, but a third turf would make less park space. However overall would like a third turf. "*

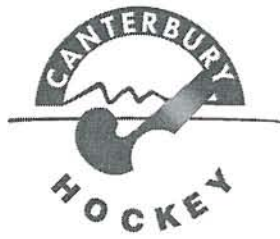

I think it will be better for the neighbours as games will not go as late neither will practises so the park will be able to turn the lights off earlier and cars and people making noise will leave earlier than they have in the past eight years I have been involved.

Having been involved with Nunweek for years I can see that it is only since the earthquake that there have been any traffic issues. I admit that it is very annoying to see the sides of the streets near the park crowded with cars as businesses have moved out to the surrounding area. This however has little if anything to do with the turf. We use the turf after work hours so these cars are gone.

There has been grass games on the same field that will be turned into a turf so there is no increase in traffic on Saturday afternoons and these games have always had enough parking (this being the busiest time of turf use) so we can already tell that there is enough car parking and that the parks green space was already in use for hockey.

I see the third turf as reducing the very late night lights and sounds coming from the park while helping A large community group try to get a little bit more normal activities without having to be up dangerously late.

As a civil engineer the only action that i see that needs to be taken is the widening of entry of the hockey car park to allow better flow in and out of the turf so there is little congestion on the road.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

The damaged Porritt Park fields must be replaced as soon as possible. The hockey fields are amongst Christchurch's most well utilized sports facilities running from early morning until late in the evening for many months of the year. This is necessary to allow players already involved in the sport to remain engaged. Hockey is achieving very good International results and is likely to drive even further involvement in the sport and this should not be curtailed by a lack of available facilities

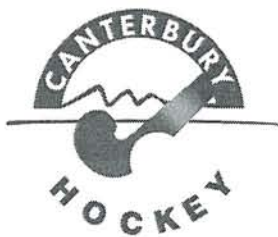

Nunweek Park has shown good ground structure through the earthquakes making it a suitable location to place a high cost and time consuming to replace sports fields that hockey turfs are on it. There also is the advantage that the supporting facilities such as changing rooms and toilets are already available.

The car park would need to be upgraded but currently is not very well designed with large amounts of unused space and an inefficient point of entry and exit. These issues would be relatively easy to resolve by utilizing the grassed areas between the current carparks. With a single point of entry and a separate point of exit the flow could dramatically be improved enhancing both flow rates and safety.

When I first lived opposite Nunweek Park it was around ¼ of its current size. I have watched it grow in size and usage to become a sporting hub for the wider Christchurch community and I believe the extra hockey field is another vital step necessary in its growth. In granting permission you will be ensuring the hockey players and their supporters have access to required facilities. The extra turf will bring many hours of pleasure to a huge number of people.

Regards Paul Moody

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

*The growth/development of hockey in Canterbury as well as the ability for players to participate in hockey is being strangled by the lack of adequate artificial turf space. Earthquake damage has meant that the two full water surfaces at Porritt and other smaller practice turfs in the city are no longer useable for both playing and training. This has placed enormous stresses on suitable times available at the remaining turfs. This situation is turning players away from the game.*

*A third turf at Nunweek Park (between the number 2 turf and Woolridge Road) would relieve this situation considerably. This third turf at Nunweek should be laid as soon as possible so that the sport of hockey in Christchurch can once again be allowed to develop with adequate facilities.*

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

With the expansion of the sport & increase in numbers playing this exciting & skilful game new fields are immediately very important. Having a complex with grounds together is economical & convenient for participants in our sport. It is convenient for all involved.

The need is separate with the loss of 2 grounds at Porritt Park. We need an international surface to attract international games.

Hockey is becoming more prominent on the world stage & more more so than in NZ with the rise in standings of both NZ teams. This has a flow on effect with player numbers. We are losing out in Canterbury by not having facilities for elite players - they are all heading to leave Canterbury to continue developing. This needs to be rectified in the new plan with new fields & updated facilities.

The facility would not only be useful for hockey but other sports as all weather pitches are invaluable.

A personal submission from Graeme J. Worner, manager of the Christ's College 1<sup>st</sup> XI hockey team

I have been involved in secondary school hockey coaching for the past 33 years and I firmly believe that hockey is the game of the future for young athletic sportsmen and sportswomen. My submission is written from the perspective of a person involved with 89 secondary school boys playing hockey for Christ's College in Canterbury Hockey Association grade competitions, all on artificial surfaces.

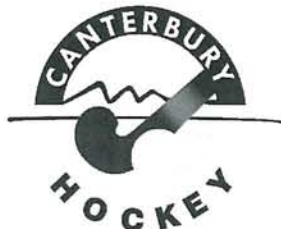

Hockey is building a strong profile as a winter sport at which NZ is internationally competitive and respected. When one looks at the National Blacksticks men's and women's sides I am disappointed to see so few Canterbury names, despite Canterbury being the powerhouse of NZ hockey for decades. This is not entirely due to the recent earthquakes, but the loss of Porritt Park has been catastrophic, and has left Canterbury hockey barely making do. It is a huge tribute to the dedication and professionalism of the those running hockey in Canterbury, that hockey has carried on. This was only possible due to the provision of a second turf at Nunweek and luckily, the St. Bede's College turf being undamaged.

If there is the opportunity to build a third turf at Nunweek Park, it must be done now, in preparation for the 2012 season.

I strongly support the view that the CCC should support the building of a third artificial turf at Nunweek Park.

GJ Worner

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

The proposed third turf at Nunweek Park is vital for the future growth and success of Canterbury Hockey.

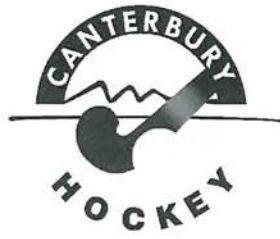

As a hockey player, coach and parent I have over two decades of personal experience of the frustrations of a lack of artificial turf facilities in Christchurch and while this started to be addressed with the completion of the Marist-St Bedes turf in 2010 to bring the city's quota up to four, the sport was significantly set back by the destruction of Porritt Park in September 2010.

Christchurch has a proud tradition of success in hockey and more registered hockey players than any other city other than Auckland and yet can only currently "boast" three full sized astroturfs. I look on with envy at much smaller cities like Timaru, Dunedin, Nelson etc. with their multiple turfs and their comparatively tiny player numbers and marvel at how easy it must be to schedule suitable practise and playing times for children, to play full length games, to allow teams to develop full field skills and strategies and to even have more than three minutes warm up time on the turf before a match!

Having joined the ranks of hockey parents in the last few years I am heartened by the huge number of children playing hockey and the wonderful job most of the clubs in Christchurch do in fostering and developing the games. I am sure this is only being enhanced by the current high profile and success of our national men's and women's Blacksticks and one would expect future success will only increase junior numbers.

The big problem is how to accommodate these player numbers and how to retain the young players who will quickly wary of cramped training facilities and inhospitable times for playing and training with the limited facilities Christchurch has. As the coach of a high school hockey team I have seen first-hand the toll playing on frozen turf at 8:00am on a bitter July morning has on the motivation of teenagers to keep playing hockey when there are so many other options available. I believe a sport is only as strong as its grass roots and it is these younger, lower grade players who usually suffer the worst times and lack of facilities and so are at greatest risk of falling by the wayside, diminishing the player base and weakening the sport's potential.

A third turf at Nunweek Park will go some way to help guarantee the future of Canterbury Hockey and address

**CHRISTCHURCH CITY COUNCIL  
Nunweek Park Proposed Third Turf  
Grant of Lease Submission**

---

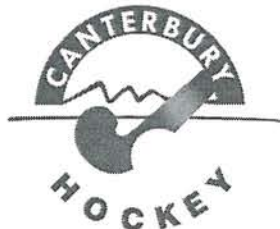

the terrible shortage of facilities faced by this proud and successful sport. At a time when access to sport is a vital ingredient in maintaining normality and hope for everyone in the Christchurch community, Canterbury Hockey is doing a fantastic job but it needs a third turf at Nunweek Park to enhance the valuable service it provides.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why? \_\_\_\_\_

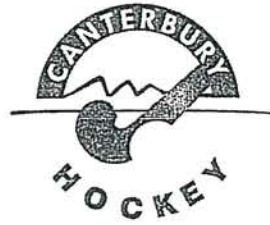

As a past NZ Black Sticks player I think it is vitally important for the development of Canterbury hockey that the proposed third turf at Nunweek Park goes ahead. Traditionally Canterbury has been an extremely strong hockey province with a very proud record of achievements and a long list of both men and women who have gone on from Club hockey in Christchurch, to represent Canterbury and then on further to play for the New Zealand team.

As a result of losing the two fantastic water based pitches at Porritt Park we must ensure that we replace this loss as soon as possible to ensure we are giving our young, keen hockey-mad children as much opportunity as possible to play on artificial surfaces all year round. Hockey is enjoying a wonderful profile at the moment, with the men's and women's Black Sticks performing so well on the international stage, and there is a wealth of young kids (and not so young kids!!) out there who are desperately wanting to emulate their heroes and play as much hockey as they can.

Nunweek Park is the ideal location for another turf as all the facilities are already in place, changing rooms, club room and parking. As the location already has two turfs the disruption to the local community will be minor as there will only be a minimal increase in the amount of traffic to the area.

We have an opportunity to get a section of the Christchurch sporting fraternity back up and running after the struggle and disappointment of the last year, and I think we should be actively encouraging our community to get out there and support any initiative that gets our children back out on the sporting fields and enjoying the sporting environment that Canterbury is so well know for and proud of.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

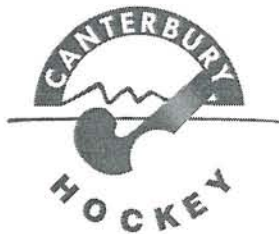

I am in total support of the lease for this this community activity being endorsed and approved by the CCC. The sport of hockey provides an active healthy sporting outlet for approximately 4000 city residents plus many thousands more residents and ratepayers who are active supporters, parents, friends and family of those that participate.

Hockey as a sport has been decimated by the loss of its Porritt Park facilities. There is a desperate shortage of artificial hockey surfaces in Christchurch for those rate payers and residents that enjoy the sport. Replacement turf space is required immediately. If approval is not given with urgency this proposed turf will not be able to be laid for use this winter. The timing of installation is critical!

Lease approval to allow the urgent provision of this third turf at Nunweek Park will alleviate some of the loss of facility the community has suffered. There are currently few places with ground suitable and it is logical to position the third turf as proposed. My understanding is that this is a permitted activity for this location.

While there are ongoing significant issues regarding the replacement the Porritt Park Regional / International class facility that need to be worked through, it is imperative that those tens of thousands community members that want to participate in hockey in the interim are supported by the council. This lease provision is one such support.

Thank you  
Richard M Munt

I am a volunteer coach – coaching all levels from primary through to women's Premier and Junior representative. The sport has always struggled for facilities and our player ratio of players to turfs is far behind any other major (and in fact minor) playing associations/towns/cities in the country.

If it wasn't for the use of third party – public and private facilities we simply would be unable to accommodate the current base.

The turfs at Nunweek and Marist Park were planned to rebalance this – but the loss of Porritt has put us back behind where we need to be.

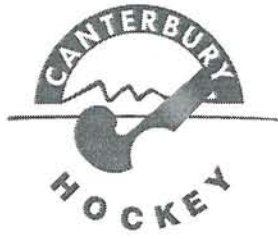

We have lost players due to the hours they have to play and train – we are unable to grow the sport at a time when New Zealand is doing so well on an international stage and we should be seeing solid growth (as has happened historically whenever the Blacksticks do well)

The council needs to support – both financially and more importantly in terms of expediting the process the creation of an additional turf at Nunweek.

It needs to be down for 2012!

Yours Sincerely  
Craig McIntosh

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

**An additional artificial turf at Nunweek Park is essential to allow hockey to grow, new players be introduced to the sport and for us to keep our current players.**

With currently only having three turfs in Christchurch we do not have the facilities to cater for an increase in numbers to the sport of hockey. We already have teams training at 10pm at night which in some cases can include school aged players. In some cases there are at least four if not more teams training on one turf at a time which is not desirable. First games of the day require players to be at the turf at 7am which in some weeks of winter means the turf is still completely frozen.

With all the earthquakes that Christchurch people have had to deal with over the past year it is important that they can continue to play sport and have some normality in their lives.

To have three turfs in total for the size of Christchurch is ridiculous when you look at far smaller regions having more turfs than Christchurch e.g. Tauranga currently has four.

If a third turf at Nunweek could be up and running for the commencement of the 2012 winter hockey season (end of March/start of April) it would mean that teams have more space to train, games could be played to full length as for 2011 some games had to have their times reduced to fit in all games and there would be facilities to be able to grow the sport of hockey.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

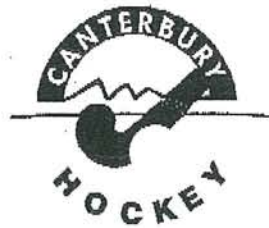

Why the council should support the provision of an additional turf at Nunweek Park, is that the existing fields are unable to accomodate existing members effectively, with teams playing + practicing at times that are considered unsocial, undesirable + unsafe.

Action the council should take for the additional hockey field is based on meeting the needs of the sport, not improving existing facilities. As the demand for hockey facilities are increased now, the council should support the lease of a third turf.

This should be done as soon as possible as the 2012 season is fast approaching.

Please continue on the reverse side if further space is required.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

Christchurch & Canterbury hockey are struggling at the moment to cater to the high demand for turf time. There would have been 5 turfs in Chch by now if the earthquake hadn't happened & that would have meant teams wouldn't have to be playing at such unsociable hours like 8am & 9pm on the weekends. It would also allow more primary grades (teams) to play on the turf if they desired. With no water based turfs in Chch now, no tournaments are being held here or any internationals because they require water based turfs. A water based turf would be ideal to help bring more income to Christchurch via tournaments & internationals. A high standard turf would also mean both mens & womens finals from <sup>the premier</sup> ~~the~~ grade could have been played at the one park, which didn't happen last year. Only one turf is

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

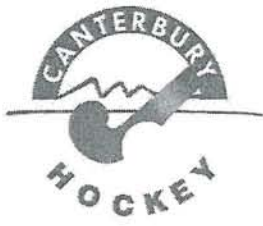

I have been involved with hockey at both club and Canterbury levels for a number of years and every week in the season I see how beneficial it would be to have another turf. Since the closure of Porit Park it has been a struggle to get turf time and will be putting people off from continuing with the sport. Having another turf at Nunweek Park would be beyond beneficial, it would allow people to spend more time on the turf and continue to grow as a sport. To me putting another turf at Nunweek is sensible as it saves families with more than one child traveling from location to location and it is a fairly easy location to find and get to. The third turf should be under way as soon as possible, it would make things so much easier and more enjoyable for people to have some stability back after the earthquakes. People should be able to continue playing and

We as an association thoroughly agree with proposal of building a third turf at Nunweek Park. With last season of only have a total of 3 Turfs in Chch games were being played very late and it was very obvious the CHA were very limited to turf allocations due to the lack of Turfs. The obvious location of another turf would be at Nunweek Park. This facility would be fantastic and make it a very central place for all hockey in Canterbury

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

**A third turf at Nunweek Park would support the development of all Canterbury players and allow our provincial game to recover from the after-shocks of loosing our main playing venues**

I personally, in the past, have been fortunate to play hockey at a very high level in Canterbury and even now, in my older years, I enjoy participating at a social level. However my enthusiasm to continue playing is quickly diminishing purely due to the lack of quality playing times. Needless to say, the game of hockey is not pleasant when scheduled at 8.30pm on a rainy, cold winter's week night. I'm sure, I am not alone in conveying the realities of Canterbury's turf shortages, (effecting both playing and training times) all which can only mean players of all ages will soon loose interest in the sport and withdraw from the game.

**CANTERBUY HOCKEY NEEDS AN ADDITIONAL TURF NOW!** I truly believe if players are forced to play a second season at ridiculous time frames, then many will make the easy decision to quit.

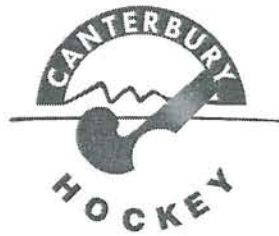

Canterbury Hockey needs to retain current player numbers for many reasons:

- Development of youth – keeping experienced players interested in the game
- Profile - Hockey is meant to be fun!
- Financial – can not afford to loose revenue sources

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

I would like to support the proposed third turf at Nunweek Park and add my name to the grant of the Lease Submission. The third turf is very important to the hockey people of Christchurch.

With two of our water based surfaces being severely damage and unrepairable in the earthquakes prior to last season. All of our games last season were played at Nunweek and Marist Park.

We were fortunate last year to have one extra turf laid at Nunweek Park but we have a desperate need for a third turf.

Last season to accommodate the games required, players had shortened game times, late and early slots to schedule all the games that were required.

We want to increase our player numbers and strength but with the lack of facilities we are unable to do this as we have a problem providing slots for the present playing numbers.

Hockey New Zealand is at an all time high. Canterbury wants to be part of that. We are in danger of losing more of our elite players, if we cannot have an extra surface for our coming season.

The Canterbury Hockey Association Board, Canterbury Artificial surfaces Trust and the CEO had arranged for the third turf to be ready for the opening of the 2012 season. Unfortunately this opening date has now been delayed.

*I support the granting of the lease as the third turf at nunweek park is vital to stop a fall off in the participation levels in hockey in Canterbury. With only 3 pitches opeating in Christchurch, and the risk of loss of the St Bedes College turf due to water restrictions and / or liquifaction at St Bedes, an additional turf in Harewood that is useable in the 2012 season is an absolue minimum to keep the sport functioning.*

---

I was a trustee of the Waimairi Artificial Surface Project (WASP) for some years until the Trust's assets were transferred to the Canterbury Hockey Foundation, now the Canterbury Artificial Surfaces Trust (CAST). WASP was responsible for the establishment of the Nunweek Park hockey facility. This submission is made in support of Canterbury Hockey being granted a lease on land at Nunweek Park for the establishment of a third artificial turf.

Following the loss of the use of the two artificial turfs at Porritt Park due to earthquake damage there has been a drastic shortage of artificial turf availability in Christchurch. Scheduled matches take up a large part of the turf time available, with some games being played at very unsatisfactory late evening times, especially in mid winter when the damp surface can start to freeze. The turf availability for essential training is also severely restricted, which impacts on the standard and quality of hockey.

I understand that some neighbouring residents have lodged objections to the granting of the lease with their main concerns relating to the increased traffic flow on Wooldridge Road and resultant safety issues that arise.

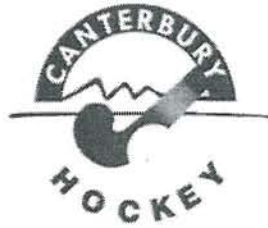

This is not a new issue and was a matter of concern when there was only one turf at Nunweek Park. WASP used to receive complaints from parents of young children about the parking congestion and narrowness of the road. Whilst the Council have made some efforts to mitigate the problems with off street parking, central zones, etc, the underlying problem is that Wooldridge Road is long overdue for widening and upgrading, given the volume of traffic it now carries. The whole of Nunweek Park has considerable sporting activity, not just the hockey facility.

The traffic issues are long overdue for urgent Council attention, and should not stand in the way of a lease for additional land on which to construct a third artificial hockey turf.

I believe that it is vital for the future development of hockey in Canterbury that this lease be approved.

Alan Edward

Please be as specific as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

I believe the council should provide land for a 3<sup>rd</sup> turf at Nunweek Park and provide 50% funding for a new turf for the 2012 season.

Given the demise of Borritt Park or unknown date for a replacement complex, a third turf within an facility would provide multiple benefits for players, local residents,

CHA, CCS, mainly: i) increased turf utilisation at one location

ii) fewer late games in winter - traffic reduced (noise) turf lights on early residents

iii) single location for tournaments - former Borritt Cup etc

iv) better time allocation for teams, meaning young skilled players won't have to be out too late after games - last season had girls not available to play 9pm games as they finished too late then had to travel up to 40-50 mins home.

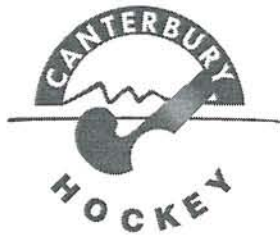

v) raises profile of hockey allowing more uptake of sport

Children need an outlet to forget the reality of the CHC E/Q's - at least extremely

Please continue on the reverse side if further space is required.

THANK YOU for making this submission.

allows this, given the lack of other sporting options  
eg. QEII. May thank for considering my input.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

Prior to the first earthquake in September 2010, Canterbury Hockey had the use of 4 full sized Hockey turfs. The September earthquake ruined two of these fields. We were fortunate enough to have one new field prior to the start of the 2011 season.

Having just the three fields last year meant that many of our competition games were reduced from 35 min halves to 30 minutes. Competition games started at 7.50am on a Saturday morning and 8.00am on a Sunday morning. We had games that started as late as 9.10pm on a Friday night. Some games in the Secondary School mid week competition were not able to be played due to "no turf available".

As far as I am aware, no other sport in Canterbury has competitions operating under these conditions.

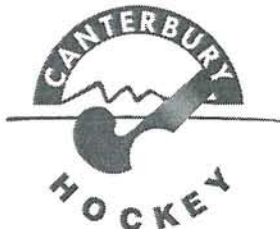

We would very much like to promote our sport, but due to the shortage of field time, there is no room to accommodate any further teams.

Our biggest need now is to replace the two International standard water turfs lost at Porrit Park, however we realise that this will be a longer process, in the meantime we are desperate for at least one more turf before the start of next season if we are going to be able to carry our sport through next season.

Everyone says that one of the best ways to combat the stress that the Canterbury residents have been going through for the last 18 months is to be involved in sport. We would like to be able to do this without our sport adding to our stress due to the hours at which we can play.

I do not wish to ignore the concerns of the neighbouring community, but Hockey as been played at Nunweek Park for many years and once the new International Turfs are established then the pressure should come off Nunweek Park. In the meantime, this new field is an absolute necessity for a sport that has produced some world class athletes from the Canterbury region.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

\_\_Since September 2010, the Canterbury Hockey members have been using 3 hockey turfs to train, play, and have social games throughout the whole year. Previously there were 4 turfs to be utilised, so this has meant the games have been starting early in the morning (8am) and finishing late at night (10pm). During the winter months this does pose a problem with some games not being able to be played because of frost on the turf which deems it dangerous to be played at such an early time in the morning. Alternatively, the late nights is not acceptable when you have school children playing in the senior competition and are training or playing until 10pm at night and then having to get out of bed early the next day for school.

With the addition of a fourth turf at Nunweek, these early starts and late nights will be reduced. The neighbouring area will also find that the traffic will not be going past at such times, and there is no reason that the traffic will increase, as the same amount of people will be attending the turf, but instead of it being at reduced hours. The hockey community are not a loud bunch of people, they are not holligans, we are respectful of the neighbouring area and the people living nearby.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

A third turf at Nunweek would be a big help for the hockey community as there has not been enough turfs which means teams have had to play late at night or less room for training. This last season I have had to train on a 1/4 of a turf which is way to small to learn new skills and to train. And some of ~~my~~ practices were at the same time as there was a limit to the room to practice. A third turf would mean games finish at a earlier time which is better

Please be as specific as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

The CCC needs to approve an additional artificial turf at Nunweek Park as soon as possible to let hockey in Christchurch continue especially for children. Games late at night are not ideal for children and an extra turf will reduce this need. The area is light industrial and with new road proposals good safe access is provided for players and their families. After all the losses of sports fields and other facilities it is important for the health and wellbeing of our children that they can be involved in organised sport within the Christchurch region. This approval needs to be given quickly so that a new turf is available for use this year!

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

Due to Porritt Parks closure an additional turf is sorely needed. My daughter plays a last season was regularly playing at 9-10pm, for a 14 year old this was too late. To enable our young people to enjoy their sport the grounds must be available.

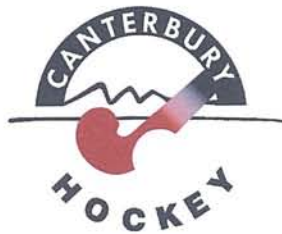

I do believe the street signage, lighting & entrance way need to be enhanced. The driveway entrance needs widening too. At the moment in the dark the entry is

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

I support the lease of the proposed third turf at Nunweek for the following reasons -;

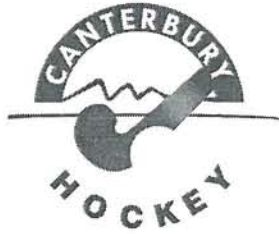

- ① As a result of the earthquake Porritt Park is beyond repair
- ② State of land and damage to East Chch means any new turf should relocate to Nunweek and gaining a third turf there is only replacing one of two artificial surfaces lost at Porritt Park.
- ③ Consider the large population shift to the west side of town.
- ④ A further turf at Nunweek would help create a "hub" for hockey. Parents would no longer have to drop children to venues all over town, but have one collection point. A consideration in these fraught times.
- ⑤ Hockey is an International Sport & a growing one, & Canterbury Hockey must strive to stay at the top. With out sufficient turfs elite & ambitious players will move away & out of town talent will not join.
- ⑥ Hockey is a well run sport with Players representing the Province with pride. It punches above its weight financially with regard to helping fund previous & current turfs

A third turf is an absolute necessity and for the above reasons I would like the Council to give consent for an additional turf at Nunweek, with plans of, <sup>the</sup> laying of the turf to commence

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

I write this while staring at piles of liquefaction outside our home in Parklands.

I strongly recommend that the Council provide all assistance possible for the installation of a third turf at Nunweek Park.

Hockey is a major game on the world stage and New Zealand has shown its ability to perform on that stage over recent years. The lack of turfs, even prior to the earthquake has affected the ability of Canterbury hockey to cater for players, especially young players.

In the men's game currently, our son Bradley is the only player in the New Zealand Men's Team from Canterbury as opposed to a few years back when Canterbury consistently provided up to half the team.

By far the majority of international hockey players learn their skills from an early age. These skills are nowadays honed on artificial surfaces and Canterbury has insufficient artificial surfaces to meet the need. The recent success at International level by both Blacksticks teams should be an excellent time to recruit more young players but to do so, more turfs are needed.

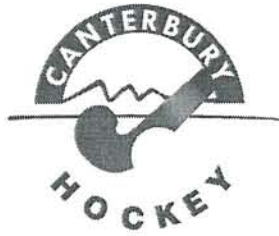

Please do all you can to support Canterbury Hockey's application.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

Because of the bloody earthquakes, damage to other hockey grounds and suffering of communities. If Christchurch is going to rise up and families encouraged to stay in Christchurch and attract others back, we need as many large sports facilities as possible. When I look at other places in the South Island, Invercargill, Timaru, Dunedin, Nelson – they all have top class facilities that allow for a growing population and seem quite attractive to me and others at the present time.

Nunweek land area has proven to be of good structure and is ideally suited to cater for the much needed extra turf. Its location is suitable and easy to many all over Christchurch with direct main routes nearby.

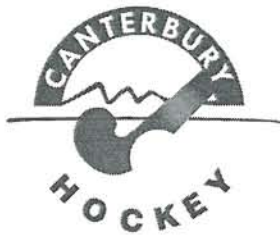

I strongly support the third turf lease be granted for the future of our city and children and should commence as soon as possible. By not having enough grounds / facilities I fear many families are going to continue to look at other options where they can get this. Some children / families may even decide to give up sport or not start due to lack of facilities.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

In order for hockey to grow and develop we need to encourage more teams and grades to enter. After having the champions league in NZ, people got a taste for hockey and at present (due to the skills required etc) it is hard to encourage newbies to the sport. If we have another turf, our current divisions will be able to play at better times, therefore encouraging more spectators (where money can be made by sales at the turf too) and we will have the resource to open up the sport ie social winter grades for those starting out. This will also enable better training times (which I'm sure all parents who drive their kids to these) will be a very positive aspect. The new turf can also be used to accommodate other sports to use like touch and soccer (football for the English readers 😊)

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

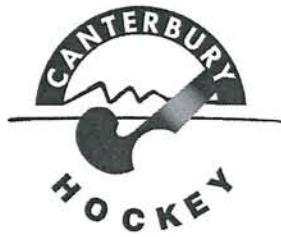

I ask the Council to give approval to Canterbury Hockey to build a third turf Nunweek Park. My reasons are as follows:

- Participation in sport, in this case hockey, is critical for the physical and mental wellbeing of the community. As a team sport hockey brings a sense of community and belonging, as well as a hard-out physical workout.
- Through the loss of turfs due to the earthquake, there is an urgent need to establish a third turf at Nunweek Park as a matter of urgency.
- Many recreational areas and facilities are inaccessible due to the earthquakes, and it is therefore even more important to ensure a third turf is available, to compensate for the loss of other facilities.
- I believe an additional turf may reduce the hours the turfs are being used each day, in which case there will be a reduction in the hours per day traffic will be accessing this area.
- I do not believe there will be an enormous amount of extra traffic if a third turf is established. Already people are carpooling to get to hockey to combat rising fuel prices.
- Any potential risks arising from the building of a third turf will be outweighed by the community benefits gained from having healthier and happier people who have a sense of belonging to a hockey team, and a commitment to remaining in Christchurch (of which an important part is being able to see a future here, which includes playing hockey).

The Council should grant the lease by the end of January to enable the turf to be built for the winter season. Long delays will only cause frustration that we are being deprived of yet another activity enjoyed by a large number of Canterbury people.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

① ADDITIONAL TURF - WITH THE LOSS OF TWO(2) ARTIFICIAL SURFACES  
AT NUNWEEK PARK THERE IS AN URGENT NEED FOR REPLACEMENT TURFS.

② COUNCIL ACTION - THE COUNCIL NEEDS TO URGENTLY CONSIDER/ APPROVE  
THE BUILDING OF FURTHER ARTIFICIAL SURFACES TO CATER FOR, &  
MEET THE NEEDS OF THE GROWING SPORT OF HOCKEY

③ CAR PARKING / INCREASED TRAFFIC FLOW.  
- IT IS DIFFICULT TO SEE HOW THERE WOULD BE  
INCREASED TRAFFIC FLOWS AS THE PREVIOUS FIVE GRASS FIELDS &  
TWO ARTIFICIAL SURFACES ARE SIMPLY BEING CONVERTED TO THREE  
GRASS & THREE ARTIFICIAL PITCHES. PREVIOUSLY 7 PITCHES (6 TRAFFIC)  
BECOMES 6 PITCHES - CLEARLY A REDUCTION IN TRAFFIC

Please continue on the reverse side if further space is required.

④ WISH A NEW PITCH - AS URGENT AS POSSIBLE

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

The Canterbury Hockey community desperately requires an additional turf just to allow current players facilities. Currently games are played at odd social times resulting in large numbers of players quitting the sport. To enable players to remain in the game, be active and feel part of the community this turf is required urgently.

Sport plays an important part in our lives and after the year we have had it is even more important!

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

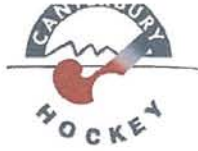

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

I think the council should take immediate action to provide another turf at Nunweek Park because with the other hockey turf at Porritt Park out of action this would provide more space for people playing or wanting to take up hockey. If we had another turf available this would cut down games having to be played late at night.

Hockey is a growing sport and having another place to play would mean children would not miss out playing the sport due to not having enough space to provide the opportunity for the children to play sport. Children these days spend far too much time sitting around on computers instead of

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

Myself and my family think that the third hockey turf is a brilliant idea. My Daughter just started playing in the 2011 season and loves it. It would be a real shame if she could not play in the 2012 season because of the lack of hockey turfs for practise and games and having to travel a long way just to practise. We hope the new turf would be up and running for 2012 season so everyone who wants to play hockey in the 2012 season gets the chance.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

Both myself and two daughters play hockey on turf here in Christchurch. After the earthquake destruction of Porritt Park availability of turfs is very limited. This results in tight time schedules, and especially in winter some game times @ very unsociable or even early hours.

I stress the importance on mental health for cantabrians to be able to exercise and play sport after such a stressful year. I would encourage council to give consent for a third turf so that it will be constructed and available for use as soon as possible.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

\_\_Canterbury needs to have two good water turfs so that it can function as part of the International community. We have lost many top class players to other centres where water turfs are available. This weakens our local competition.

As this is not likely in the near future it is sensible to build a third one at Nunweek where we have an already established base and there is land available to build one on.

Without another turf, clubs will struggle to have turf training time for all teams. This was felt most by clubs from the eastern suburbs where their junior teams did not have satisfactory venues or times for practices in 2011. Some grades had shortened game times so that all games could be played each week. This was fine for 2011 but not for the long term.

Establishing the new turf, under such difficult conditions this year was fantastic for the players. Playing hockey is such a stress reliever that I'm sure it kept many of us sane this year. But it will be hard to maintain the player base without another turf.

It is also important to consider redeveloping the existing car park. It currently wastes a lot of space.

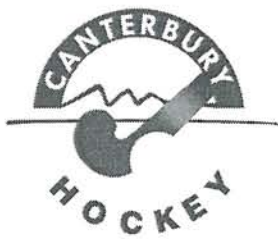

Hockey has been an important part of my life for 50+ years, it keeps me fit, I'm continually developing new skills, it is a fantastic social sport and I still love the game.  
So please allow this new turf development to go ahead in time for the new season in 2012.

---

Please continue on the reverse side if further space is required.

THANK YOU for making this submission.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

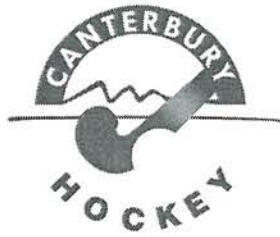

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

As a former Canterbury representative I would like to ensure that the young hockey players have the same opportunity as I did growing up in Canterbury were hockey was once very strong. Having lost the two turfs at Porritt Park we need an additional turf to alleviate the pressure on the current turfs, with teams having to train later and play later to fit all the games in each week. Nunweek Park has the infrastructure to support another turf with parking and changing room facilities etc.

If the approval was given for a new turf it would be a great opportunity to have it completed for the 2012 season.

With access to sporting facilities being limited due to the destruction of the earthquakes we want to encourage Cantabrians to get back into the normality of life and sport has always been a very strong culture within Canterbury.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

To whom it may concern

Firstly I would like to thank the Christchurch City Council for its on-going support and assistance provided to hockey in the Canterbury region. I would now ask that the Council continue this support, by granting the lease for a proposed third turf at Nunweek Park, at their community board meeting on Friday 24<sup>th</sup> February. A third turf would be of enormous benefit to hockey, and the wider community through continued growth of player numbers and supporters, and through the financial development it would bring to the City of Christchurch.

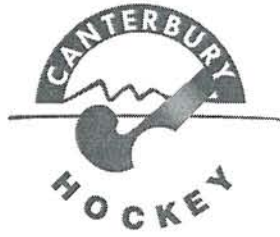

At present Canterbury Hockey faces major challenges in its present development of the game and its ability to meet the demands of growth in numbers in the hockey community. After the severe damage to the Porritt Park turfs and facilities from the earthquake on September 4<sup>th</sup> 2010, the need to provide a new prime facility for hockey has become vital to support hockey's present infrastructure. Nunweek Park has now become hockey's new sporting hub. Over the past years hockey at Nunweek Park has been well utilised, not just on the turfs, but also on the grass fields surrounding its perimeter. Canterbury Hockey has provided for our community, hockey development and resource programmes for Christchurch children, schools, and adults. In order to deliver these programmes effectively, they require high quality facilities. A third turf will enable hockey to help address some of the major issues it has of sustainability, and access to playing surfaces for the hockey community. This turf will also provide numerous opportunities to showcase Christchurch once again as a first class facility for hockey.

Yours sincerely

Lyndsey Jones

After the loss of our premier turfs at Porritt Park earlier this year, we as players and coaches have struggled for consistent turf times not only for playing but also training.

The junior teams I am involved with had to train on a small turf at Sydenham park which although not completely reined by events of February 22<sup>nd</sup> certainly is well below expectation of what we would expect were in previous seasons we had trained at Porritt

This problem of available turf also meant our junior teams had to play on a 1/8 sized practice turf at Hornby which really is not ideal for the development of our younger players, as opposed to playing on a 1/2 turf at one of our venues. The scheduling times of our games also meant that on game day our game could be anywhere from 7.45 am through to 1.45 pm. Although we are all great full that the CHA could manager to fit most teams in it is very difficult for many families to manage the time spread.

As a player playing in the midweek competition, turf availability was also a concern meaning there was no training time suitable for many team and on game day, start times would vary from as early as 6.00 pm or as late as 8.40 pm, (and not finishing 10.00pm) Although once again we are all appreciative of being allocated game time, the scheduling of these time, especially for the early games meant many team members struggle to be available for the 6.00 pm, especially with the compounded rush hour traffic issues that Christchurch faced this year.

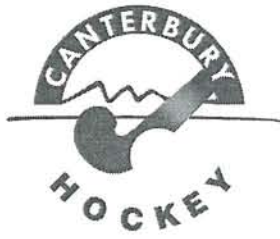

As a hockey community it is vital that we have access to additional turf to easy playing congestion and also have slightly less parameters around playing times. The growth of hockey in the coming years is also a very important factor with both our Men's and Womens National teams excelling in our sport and hopefully will be medal contenders at next year's Olympics. It is critical moving forward that we have the capacity to cater for the growing needs of our children in our community, especially given the life changing experience many have been through in the last 15 months.

Nunweek Park being the home of Hockey in Canterbury is the logical location for additional turf and will complement the facilities that are already established at this venue. As a hockey community we desperately require the CCC to get behind this submission and support our future generation with additional turf. The addition of a third turf at Nunweek Park would be fantastic and we should all work together to ensure that this can happen before the next winter season.

Regards

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

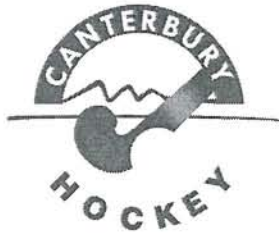

Christchurch is in desperate need of another hockey turf to help maintain existing playing numbers, let alone grow the game of hockey in Christchurch. The existing situation sees teams having to practice very late at night as they cannot acquire turf time at any other time. And even when they get their practice time they have to share the turf with up to three other teams at a time. The scheduling of games is very problematic due to the shortage of turf space and again teams can find themselves playing at very unsociable times because of it. Hockey is presently experiencing huge success at a national level and it would be a travesty if Canterbury Hockey Association (CHA) cannot build on this success in Christchurch. In my opinion, lack of turf space is the biggest hindrance to being able to grow the game. Lack of turf space also impacts on the quality of hockey players that Canterbury is producing. CHA is presently reviewing the competition structure to help develop higher quality players, but they will be hamstrung if they do not have the additional turf space which is integral to changing the competition structure.

Placing a new turf at Nunweek Park is the obvious place for a new turf. Firstly there is plenty of space (providing the City Council agrees to the lease) and having all the turfs in a centralised area is very convenient to the hockey community. The recent seismic events in Christchurch endorse the suitability of the land for a turf also. It is conveniently located to CHA and there are facilities (changing rooms, toilets, grandstand) already located at Nunweek Park.

The new turf needs to be in place for the 2012 hockey season. CHA has been severely depleted by loosing Porritt Park and while this turf won't be at the standard needed for international hockey, it will see the turf numbers available in Christchurch restored to pre-quake levels. I believe (and I'm sure CHA will be able to confirm this) that having three turfs at Nunweek Park will again allow Christchurch to hold national hockey tournaments.

The Christchurch hockey community cannot wait until turfs of international standing are built in Christchurch as this is realistically going to be another 5 years ago. Interim measures have been made for the Crusaders at Addington Park, and I believe similar measures need to be made for hockey.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

.....

The requirement for a fourth turf in the Canterbury area was highlighted prior to the September earthquake, with games starting as early as 8am and finishing as late as 11.00pm at night, an extra turf would have made the game times more workable not just for the players but also for the locals in the area. If we have the time and space available we can finish at earlier times which will remove noise from the areas affected.

As for competition planning the extra turf will allow more flexibility to the schools and clubs in the case of cancellations etc. At present there is simply not enough playable hours in the week to achieve this with timeslots so booked up. Even the representative trainings mean someone else is missing out.

Having the third turf at Nunweek centralises the bulk of the hockey played in our competition and would offer a superior venue for national competitions ranging from schools nationals to off season masters.

The organisational advantages would be significant as far as grounds maintenance goes with a co-located area easier to manage and no need for separate staffing at a remote site.

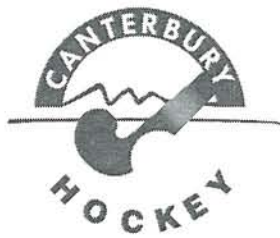

The older values of yesteryear for our code could be re-established garnering greater buy in from our younger players.

Turf hurt these values by developing a play and run philosophy. We need our younger players to watch hockey as well as play so there development can be accentuated.

The developmental aspects are huge as well with more training slots available to clubs and schools and having it all co-located means groups can bulk book a set time slot allowing back up players to transverse to the appropriate field as weekly needs dictate.

With careful forethought and planning we can minimise the impact in the area while still gaining the huge benefits of this project. We can work with the local community to minimise impact while creating a positive vibe to enhance the area.

---

**CHRISTCHURCH CITY COUNCIL  
Nunweek Park Proposed Third Turf  
Grant of Lease Submission**

---

Our community needs another turf, we do not want to be turning players away from our code because we cannot get the playing space or time. This has been the case for some clubs as they cannot get time slots from thin air. Training times are a premium saved for upper grades stunting the development of those coming through.

**Not because of cost – Because of availability.**

Having the turfs co-located is economically, organisationally and promotionally the best way for us to develop not just the sport, but our region as a leader in our code. With the grounds developed we can really drive the potential to our national body. This will bring in some tourism and flow through to the greater community not just Hockey.

Thank you.

Regards  
Clint Thorburn.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

Canterbury Hockey lost its 2 best turfs due to the earthquake. Hockey is a popular sport and all of Christchurch is expected to use only 2 turfs (not even professional water turfs).

Whereas in most other sports they play on a Saturday – we have to play at all hours of the night during the week and all times during the weekend just to fit everyone in. Practice times are spread over different schools turfs and mostly these are not even a proper sized turf.

This new turf should be built as soon as possible so that we can also have international hockey again played in Christchurch especially after the great success of the Champions Trophy in Auckland.

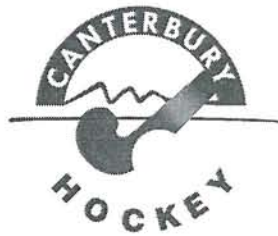

Why the neighbours are complaining, I don't know! There aren't any houses near by and the majority of players play hockey and go home. It's not a loud sport.

Christchurch is rebuilding and we need another turf desperately, thank you.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

*Due to the earthquake in September two key hockey fields where destroyed leaving us short of hockey fields.*

*Although population has decreased in Christchurch, this is not evident in the numbers that are turning up to play. By not having another hockey field, will only mean that more games will be played late for night games, and this will mean night lights will most certainly be on late for most evenings, this could be annoying for neighbours.*

*For some players playing late is really not ideal, having other commitments etc. Sport is essential for a Community, not only for promoting health, but also for the social aspect of the sport where people can be part of team. To not include a third turf will be another blow to the hockey community of Canterbury.*

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

- Canterbury Hockey is struggling with its ability to meet the needs of its current playing numbers. Inefficient Turfs are available to meet the numbers playing which in particular is detrimental to Junior Hockey.
- Lack of Turf time results in difficult game times for all players. A third Turf would relieve this.
- I see little detrimental effect on the Nunweek Park area during the construction phase or when the new Turf is completed.
- Canterbury Hockey & all players need this third Turf to develop hockey in Canterbury.

Please continue on the reverse side if further space is required.

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

The Canterbury community require a 3<sup>rd</sup> turf in CHCH desperately with the demise of Porritt park. Sporting opportunities provide the community with opportunities for improving physical and mental health - with the earthquakes these are even more important than normal.

It is also important we try to return to normal activities and the location of Nunweek park is suitable to most areas of CHCH.

With the need to return economic development to Canterbury the addition of an extra turf and facilities to Nunweek will make this a desirable location to bring more national events to Christchurch and if done properly possibly international events.

With regards to concerns re traffic flows increasing in the area – this should not be too much of an issue as the numbers playing will not improve dramatically but the 3<sup>rd</sup> turf will allow better scheduling of games meaning less late games meaning the neighbours should see an improvement.

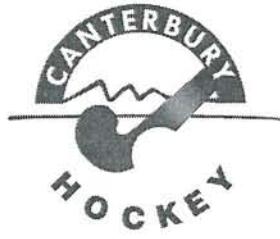

I have played hockey in CHCH for the last 20 years and last year was extremely hard on the hockey community with the loss of porritt park – please decide in favour of the 3<sup>rd</sup> turf at Nunweek

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

Another hockey turf for the Christchurch community is an absolute necessity for the 2012 season. The main venue for hockey in Ch-ch (Porritt Park) was decimated in the September earthquake, leaving the fields unplayable. This has resulted in outrageous match and training times. To expect school age players to have to train up until 10pm on a weeknight, or to play up until 9pm on a sunday is unacceptable to most parents. It is really crucial that people (youngsters in particular) continue to play their chosen sport, in this instance, hockey. Many will be discouraged if they see another season of playing or training through winter at times when the turfs are often starting to ice over. Hockey is an expensive sport at the best of times, with most clubs relying on Gaming machine funding to keep subs down and to run at a zero balance. It is quite discouraging when the general public sees millions of Council and Government dollars being pumped into Rugby League Park for what is a professional sport, and knowing that this particular venue is really only being built for the playing use of an elite few. Another Hockey turf at Nunweek park would benefit huge numbers of people and assist in keeping quake ravaged citizens of Christchurch actively involved in sport. Thank you for taking the time to read this submission.

A third turf at Nunweek Park is essential for Canterbury Hockey. The current situation in Christchurch is dire, with a limited number of turfs available for competition, and training.

Hockey is an ever increasing popular sport with the numbers of children, youth and adults playing each year increasing.

A third turf at Nunweek Park will make it possible for so many more games to take place, with further options for training times and venue.

Our children need to be encouraged to participate and enjoy this great sport. A lack of turf, game-time, and training time is detrimental to the ability of children to enjoy the game (and also the Coaches, Parents and Supporters).

The future of Canterbury Hockey relies on the additional turf at Nunweek. Last years experience with the hockey competition makes it a 'no-brainer' to elect to add a turf at Nunweek.

Yes, there will be traffic and parking issues, however these will need to be addressed, and can certainly be improved upon. The car park at Nunweek will need to be re-designed, so that more efficient parking spaces can be created. All achievable, I expect.

A third turf at Nunweek – ESSENTIAL!!!

Please consider this application favourably. The third turf at Nunweek and the associated issues need to be completed in time for the next season of hockey – 2012.

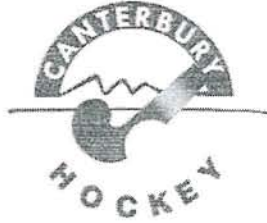

Thank you  
Jacqui Johnson

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

I support the lease for the proposed third turf at Nunweek Park because since Parnit Park has been out of action due to the Sept 2010 earthquake turf time has become very limited at the same time that hockey appears to be increasing in popularity. Players have been forced to play at unsociable hours ie 8:10pm on Friday nights / 8am on Sunday mornings. Teams have had to be limited and restrictions put on playing opportunities ie 4/5 games max allowed when playing up a grade. At Nunweek Park there is the space and demand for a third turf.

Canterbury Hockey is hosting the premier national

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

I played hockey for many years as a kid and even into my teenage years! The hockey community was a tight knit community that always provided the best sporting environment possible. I played at both Nunweek & pavit and now that pavit has gone I feel the sport will take a hit when it doesn't deserve to. Having an extra turf would provide the hockey community with a much needed extra facility. I would find it disappointing to see hockey not be given the opportunity to bring its facilities back onto its original, well respected and highly used conditions. I think also a turf should be built at Nunweek as the ground conditions are amazing and have been rarely affected by the weather. ~~Thanks~~

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

Canterbury Hockey has been set back 15/20 years with the loss of Porritt Park and facilities. There is an opportunity for the Council to assist in approving a third surface at Nunweek Park. This will not bring international fixtures to the City but it will greatly assist the sport in providing competitions for their stakeholders which are within reason. Secondary age players not finishing until 9.30 pm/10.00 pm on a competition night is not satisfactory and 8 am starts in winter are not attractive and often too early for ice to have thawed.

Along with all major sports in Christchurch, Canterbury Hockey has suffered immensely with the loss of Porritt Park and the sport is not able to deliver programmes that will enable the sport to be competitive with other Associations in New Zealand. Hockey is now played on artificial surfaces and the sport has over a number of years struggled to provide their stakeholders with sufficient time to practise and competitions are modified to suit the demand. This lack of services was overcome in 2011 due to the patience of players and parents and officials, however the sport will lose players if training times are late at night during the winter and competitions start too early and finish too late.

A third turf at Nunweek Park will assist the sport in holding players and providing suitable training and playing times until such time as Porritt Park is relocated and replaced. The proposed turf is only wet dressed, not water and that has Canterbury at a huge disadvantage.

**CHRISTCHURCH CITY COUNCIL  
Nunweek Park Proposed Third Turf  
Grant of Lease Submission**

Please be as **specific** as possible outlining why you support the lease for the proposed third turf at Nunweek Park to be granted. This will help the Council understand your views, and how much the third turf means to both yourself and the wider Canterbury Hockey Community.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

We would like the council to urgently approve the lease for the third turf at Nunweek. Ideally, construction of the third turf should be completed before the start of the 2012 season (April 2012).

Reasons for our support include;

- allowing children to play at a more reasonable hour (currently games can start before 8am, and can finish close to 10pm)
- more reasonable practice times and space (currently teams train on a 1/4 of a turf - very congested with 11 or more players; practices can finish after 10pm)
- enable representative teams to practice more frequently with an appropriate amount of space

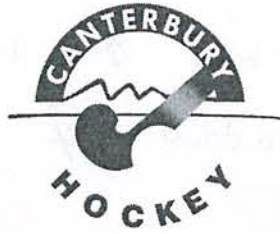

Please continue on the reverse side if further space is required.

THANK YOU for making this submission.

P.T.O.

- will allow games to be played for the full scheduled time (games are currently shortened to allow the last game to finish at a reasonable hour)
- As a comparison, North Shore city (with a population half that of Christchurch) has at least 6 water based turfs. With the third turf at Nunweek, Christchurch will have 4 turfs (only one of which is water based).

I am writing in support of the proposed  
third turf at Nunweek. It seems to me to be  
a great initiative to get another facility based  
on where there is current infrastructure establish.  
It is on land practically unaffected by earthquakes  
and having it would provide not only a much need  
surface but a morale boost to our battered city.  
Although it is not the ideal and doesn't replace Parsitt Park  
as a national/international venue, it does provide a  
good interim solution.

I understand there is some objection to the proposal on  
grounds of traffic. It is true Woodbridge Rd does have  
traffic issue which need to be address but this turf

Please continue on the reverse side if further space is required.

THANK YOU for making this submission.

PTC →

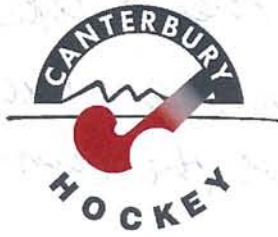

.Pd  
is unlikely to exacerbate the situation as activity will  
be largely based outside of work hours (evenings  
and weekends)

P.S. I would support a move to get priority to  
improve Woolbridge. In particular, streetlighting, extension of  
foot path and some minor widening.  
Traffic flows have increased notably since the  
earthquakes ~~for~~ as businesses have moved  
west. A reassessment of vehicle movements  
per se would be justified.

(The new lane marking going west on  
Horewood Rd are a great low cost improvement  
but perhaps traffic lights can be justified?)

Steve Nume.

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

I completely support the lease for a new turf at Nunweek Park as I am a hockey player and have been for the last 25 yrs. We were dealt an unimaginable blow when Porritt Park was so devastatingly ruined in Feb Earthquake. Not only did we lose the best turf in CHCH to play on, but also lost any national/international games to our city as no other facility is up to International Standard. Hockey is a growing sport and one I hope to encourage my future children to play - but this won't be possible if we only have the 3 current turfs. We are simply running out of room to play and this

Please continue on the reverse side if further space is required.

THANK YOU for making this submission.

means, future potential players will not be able to participate, or current players will have to be cut short

from playing as long as they'd like.

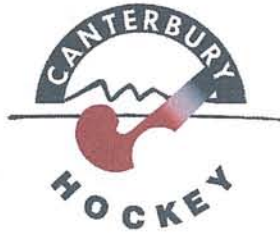

While I hope one day we can have turf facilities in East Christchurch, for now I hope the Council approve the lease for the 3rd turf.

I don't think the neighboring residents concerns are valid as the 2nd turf was recently built with little disruption around the area. The increase in traffic flow would be well managed by considerate hockey drivers and with the weeknite hockey games, the roads are less busy with locals so shouldn't impede anyone. As for the weekend games, the area is already busy with the grass sports (soccer/rugby) so I don't think an extra hockey turf is going to impact hugely on an already buzzing area during the day.

I think the Council should approve this lease asap so our 2012 hockey season can start on a positive note.

Best regards

MWJ

Why do you want the Council to consider the provision of an additional artificial turf? What specific action you think the council should take? When this should be done and why?

A third turf is definitely needed. This hockey season, following the loss of both Parritt turfs, many teams have suffered. Some have been forced to practice in the very early morning or very late in the evening, and many team's practice space has been downgraded as well, meaning they have less space to practice and therefore cannot build up their skills as well as they might have which makes their games suffer. Late game times have also been a problem, for me in particular. I played for a high school team on Friday nights in youth division and we had some games that ended as late as 10.30 pm. Which meant that often

Please continue on the reverse side if further space is required.

THANK YOU for making this submission.

there were problems with transport and we had fewer supporters than we might have. With fewer turfs we will have fewer teams, which means that fewer children coming into hockey will be able to properly get into the sport.

The Council should definitely build a new turf, and soon, preferably sometime within the next year before further strain is put on Christchurch hockey teams.

We would fully support a third field at nunweek park. As the hockey community has lost porritt park there is a great need for more grounds. As coaches of a junior 8 team there are so many juniors wanting to play and it would be a great shame to turn them away due to lack of facilities in the city

To be able to host international tournaments would be a benefit to the city as it is trying to rebuild.

This should be done as soon as possible.

**Subject:** Nunweek Park - Third Hockey Turf - Submission against

19 January 2012

Submission regarding Proposed Third Hockey Turf at Nunweek Park, Harewood

From: Gordon and Ann Kenning, 257 (261) Wooldridge Road, Harewood, Christchurch.  
Phone: 3598-292 or 0274 329 693.

We have lived in Wooldridge Road for the past 16 years and appreciate the rural nature of this area.

We strongly object to the proposed third hockey turf mainly for:

1. Traffic Congestion - we have great difficulty driving out our entrance at many times because of the increased traffic on the street after the recent earthquakes and also because of the increased number of vehicles parked really close to our entrance when sporting events are on. Another hockey turf will only make this worse as there are not enough car-parks provided at this stage. The providing of 15 more car-parks by Canterbury Hockey will not solve the problem, they must think parking is a problem or they would not be offering to do this. We even have some cars parked on our property when sport is on. With the proposed changes by the NZTA to Wairakei Road access to Russley Road, traffic is being encouraged to use Wooldridge Road so this will only make things worse.

2. We find the noise from the hockey nights is quite loud in spite of our double glazing - regarded as necessary for the airport noise as part of our resource consent to build - and the loudspeaker, especially on Sunday mornings from 8am is very loud.

3. The hockey turfs with fencing and light poles that are there now look a bit like a POW camp and we can only imagine having a third turf with the existing trees removed and replaced by shrubs and large light towers will only make it look more so. Why do we have to give up our beautiful park to these eyesores? No-one is allowed to subdivide their land round here for any purpose but it seems the park can be carved up at the Council's will. What happens when Canterbury Hockey decides that three turfs are not enough and decide to add more? Will they be able to apply for this too?

Nunweek Park is used by many people at this southern end for walking, running, picnicking, kite flying, cricket hits, soccer, touch rugby informally etc and that is in the area where this proposed hockey turf is to go. We are very against this proposal as it is just another example of one sector of our society being able to affect so many other people negatively. Is this the start of other sports/organisations being able to claim they need to fence off parts of our parks for their own interests?

Gordon and Ann Kenning

Subject: FW: NUNWEEK PARK HOCKEY

While we sympathise with Canterbury Hockey on losing their facilities at Porritt Park in the earthquake we, as local residents and actively involved with athletics in Canterbury, have a few issues regarding the proposal to add a third hockey ground at Nunweek Park. Our concerns are as follows:

1. Restricted use of approximately 20% of the park. Looking at the site plan it looks obvious that once the third field is created that a fence will be erected around the whole area rather than the individual fields being fenced as they currently are. Either way the access around the outside of the leased area appears to be limited. As regular users of the park for walking, running and training a group of runners we currently enjoy being able to navigate easily through and around the car park and outside the leased area with added access to the small reserve that is linked behind the hockey ground that comes through to Wairakei Road. This circuit creates approximately 2.5km of good running which could well be reduced to just 2km if access to this area is restricted or difficult. It also removes a good portion of the shaded running area.
2. The existing car parking will not service increased activity at the hockey ground, especially as there is limited good parking on Wooldridges Road so cars will begin parking in Talisker Place and Skydale Drive which is narrow anyway. There are a number of young children who live in the area and with cars parking on both sides of Skydale Drive leaving only a narrow passage to get through there will be a danger to pedestrians, especially children. We live in St Clair Close so have experienced the carking of park users when Touch Rugby is on with cars parking both sides of the road and in some cases on the roundabouts and restricting residents access to their homes.
3. It is disappointing to read that 22 trees will be lost and replaced with lights and shrubs. Currently there are a number of trees marked with pink dot. If these are the ones to go it would be a significant loss to the park.
4. We read in the Press last week that Canterbury Hockey seem to be of the opinion that the laying of this third field is a forgone conclusion and it was stated that a fourth field was to follow immediately afterwards. Your submission information states "This third, and last, lit artificial ..... " so what is the real situation?
5. One of the disadvantages to the public and local residents is that once the hockey turf is in place the fencing it excludes all other park users. It seems very sad that as a local resident we will be excluded from using using a significant section of the park. In Hagley Park at least the netball courts are still available for use by the public when games are not being played. The same with Soccer, Rugby and this was the case at QEII for athletics before the quakes. In our view excluding people from significant areas of public space is contradictory .
6. It appears totally unreasonable for Canterbury Hockey to be pushing hard to gain control over a public facility that has many regular users. They aren't the only sport that has been affected by the earthquake and as stated we are part of the Athletics Canterbury community that you'll be aware lost not only the all weather

25  
track at QE11 but the all weather no. 2 track behind the stadium as well as equipment. At present we have to commute regularly to Timaru with no assistance from the sport or government for increased costs or compete at the new base of Rawhiti Domain which is a grass track of slightly better than average quality. Not only did we lose the facilities at QE11 but there were also two grass tracks at the University that have been lost due to the University building on these fields so that's another two training grounds gone. The University Oval grass track was the best grass track in Canterbury as well. In our opinion Canterbury Hockey should be looking at a longer term solution to find a suitable location that is currently not being used.

Regards

Mike Riley & Wendy Fox-Turnbull  
7 St. Clair Close  
Harewood

**Subject:** Proposed New Lease Area for Third Hockey Turf- Nunweek Park:joanne.walton@ccc.govt.nz

Proposed New Lease Area for Third Hockey Turf- Nunweek Park.

I am opposed to the council granting a ground lease to the Canterbury Artificial Surfaces Trust to develop a third **lit artificial surface hockey turf.**

1. **There are currently two fields that operate from early morning to late at night on up to 7 days per week. In this residential and green park setting I believe that a third will be excessive. The grounds already generate considerable noise and bright light adjacent to the developed residential area of Skydale Drive.**
2. **The proposal allows for activity from 8am to 10pm up to 7 days per week.. The noise generated from this third field could be excessive. We argue that adequate consideration is not being given to rate-paying residents who are nearby.**
3. **The proposal allows for 8 lighting towers. Although it is stated that there are *controls* related to light spill and glare. There are already lighting towers associated with the other two fields. The amount of light emanating from the third field will add to this extensive day/night lighting across this whole area and into houses in the subdivision.**
4. **Building this field will involve the removal of both green space and amenity trees in this space. The galvanised towers and high fences are no substitute for the natural park amenity.**
5. **The field is being constructed very close to Woolridge Road and this presents traffic safety issues where cars often exceed the speed limit of 50 km. When there are primary after school sports events on Nunweek Park, the roadsides are packed with cars, and the hockey carparks are fully occupied. When the new field is erected I am concerned about access to and from the carpark, and children having to walk along Woolridge Road to access the fields.**
6. **Access through the park will be impeded by the field.**
7. **According to a recent Press statement, the Canterbury Artificial Surfaces Trust will quickly move to develop another 4th field on the space adjacent to Skydale Drive.**
8. **In summary I have concerns about the consenting of this facility based on the:**
  - o **number of fields**
  - o **excessive sound generated 7 days per week**
  - o **excessive light levels into late evening**
  - o **removal of amenity trees and green space replaced by unsightly fences and lighting stands**
  - o **reduced access for walkers and joggers across the park**

- **danger to children walking adjacent to Woolridge Road on sports days when parking in the hockey carpark**
- **impeded access through the park for walkers and joggers**
- **precedent in granting this 3rd consent for the development of a 4th field adjacent to housing on Skydale.**
