

**7. MANUAL FOR THE DESIGN OF WATERWAYS, WETLANDS
AND DRAINAGE**

RR 8278

The Water Services Manager backgrounded the new draft design manual for waterways, wetlands and drainage, which will replace the existing one within the code of practice for urban subdivision.

The Committee **decided**:

1. That it support the adoption of the design manual, subject to clause 10.1 (Planting Guidelines - Introduction) being amended to provide for the planting strategy for waterways and wetlands to be in line with the city-wide planting strategy.
2. That the Committee attend the 18 August 1998 City Services Committee special meeting, to discuss the recommendations further.
3. That consideration be given to the city-wide planting strategy implementation being given priority in the 1998/99 financial year.
