

5. LATIMER SQUARE

The Board considered an option proposed in the Latimer Square Neighbourhood Improvement Plan that Latimer Square be made into one grassed area by closing Worcester Street through the centre of the Square. This proposal would provide a welcome open space for that area and would also become a natural buffer between the City and the residential area to the East.

The Board **decided:**

1. To support a request to the Central City Committee and the Parks and Recreation Committee asking that high priority be given to this proposal.
2. To request that the Board be advised when it may expect that the funding for this project, which was deleted from the 1998/99 budget, will be reinstated.
