

6. ASIAN YOUTH INITIATIVE

Arising from the Asian Youth Research, an identified initiative seeking to appoint a person who could assist Asian students in coping with the New Zealand way of life, culture and expectations was reported by the Community Activities Officer.

The Board **decided** to support the initiative and recommended that the Christchurch City Council pursue a partnership with local high schools to fund this position and that a Working Party of the three Boards meet to discuss the initiative to support the establishment of this position in time for the start of the 1999 school year.
