

**16. CREYKE ROAD/CLYDE ROAD/KOTARE STREET INTERSECTION
PROPOSED TRAFFIC SIGNALS**

RR 8709

As a prelude to consideration by the City Services Committee, the Board had been invited to respond to the proposal to install traffic signals at the intersection thereby reducing the high delays and long traffic queues presently occurring during the am and pm peak periods.

In **deciding** to support the proposed traffic signals including provision for cyclists and pedestrians, the Board also asked that the City Services Committee investigate other elements which would provide benefits for all road users such as slip lanes and right turn green arrows.
