

24. HARTLEY AVENUE RAILWAY OVERBRIDGE–UPDATE

RR 8796

The Board **received** a report from the City Streets Unit detailing progress to date on the railway overbridge including the outcomes of the Board funded structural report regarding requirements to replace or upgrade the overbridge.

The report advised that the Road Safety for Schools Steering Group had resolved that option A be proceeded with as soon as possible. This was the minimum cost option at \$12,000 and would ensure that the bridge was brought up to a safe standard and would also be aesthetically improved.
