

33. COMMUNITY BOARD PROJECT PROPOSALS 1999/2000

The Board considered a report outlining the response from Council Units to the Board on its project proposals made to the Christchurch City Council Plan: 1999 Edition.

In discussion the comment was made that fuller and more comprehensive responses from the Council Units would have been of assistance to Board members in understanding the staff reasons where Board and staff priorities differed. The Traffic Engineer: Major Roads and Transport Improvements undertook to provide fuller comments and reasons to Board members for the staff rankings made of project proposals.

The Board **decided** that the Chairperson and the Community Advocate should meet with the relevant Unit Managers to resolve any differences that may have arisen.
