

4. CANTERBURY UNIVERSITY (22) BUS SERVICE REVIEW

RR 9596

The Board was provided with an early opportunity to raise with the Canterbury Regional Council any issues regarding the existing bus service prior to re-tendering occurring later in the year. Any feedback from the Board would be included in the service review and incorporated into an issues and options paper for consideration by the Regional Council prior to being circulated throughout the community for comment.

In response to the Regional Council's invitation for comment, the Board **decided** as follows:

1. That the continuation of the existing service be supported subject to there being no adverse comment received but that if so received, the Board desires to be further involved.
2. That the contract specifications provide for the use of smaller buses when and where appropriate.
