

**3. ILAM/AORANGI ROADS INTERSECTION CHANGES
– RESULTS OF CONSULTATION**

RR 9120

The Area Engineer reported on the feedback received in response to the publicity pamphlet on the proposed intersection improvements which had been distributed to the local community at the end of February.

The report summarised the range of issues that had arisen from the consultation, including a request from the St Stephen's Presbyterian Church that the project be delayed until an investigation had been carried out to do with their off-street parking requirements.

In acknowledgement of the Church's request, the Chairman noted that there appeared to be an opportunity to enhance egress from the Church property and as such felt that the Board's Works & Traffic Safety Committee should meet with representatives of the church to discuss these matters further.

The Board **decided** to refer the matter to its Works & Traffic Safety Committee for further discussion with representatives of St Stephen's Presbyterian Church and report back to the Board.
