

**5. MAIDSTONE ROAD/WAIMAIRI ROAD
INTERSECTION IMPROVEMENTS**

RR 9954

Consideration was given to a detailed report from the Transportation Safety Engineer setting out a number of options for capacity improvements at the intersection of Maidstone Road and Waimairi Road.

The matter of Wadeley Road and its relationship with the Waimairi/Maidstone intersection was also addressed in the report.

Having considered the various options submitted, the Board **decided:**

1. That the proposal to install the Option 2 traffic signals at the Maidstone/Waimairi intersection proceed without the loss of carparks in front of the shops.
2. That planning and consultation for the restriction of the traffic volume on Wadeley Road in conjunction with associated capacity improvements at the Maidstone/Waimairi intersection continue.
3. That the additional \$62,000 required for the Option 2 proposal be funded from within the City Streets Unit's capital works programme.
4. That Option 2 for improvements at this intersection be endorsed as a basis for public consultation.
5. That the Board be informed of the outcomes from the consultation process.
6. That the Council provide for the appropriate planning to progress Option 4 for implementation in as short a time frame as possible.
