

8. MEMORIAL AVENUE – PLANTING PROJECT

RR 9603

Andrew Craig, Landscape Architect presented for the information of the Board, a Concept Planting Plan for Memorial Avenue (Russley Road to Orchard Road).

The matter of planting along this section of Memorial Avenue being the main approach/exit point from the Christchurch International Airport had been discussed by the Board on a number of earlier occasions. More recently the emphasis for this particular project has been linked with the proposed Millenium roadside planting along State Highway 1, including the full length of Johns/Russley Roads. Earlier considerations on the concept had involved discussions with the Airport Company and the Christchurch Beautifying Association.

In receiving the information, the Board **decided** that the Concept Plan be referred to the Works & Traffic Safety Committee for further consideration and report back.
