

6. BEVERLEY PARK SOIL SHED

The Board considered a report outlining the background and present situation with reference to the Englefield Residents' Association's recent objections to the proposed soil shed at Beverley Park.

This report was brought to the Board as a result of a resolution at the 3 February 1999 Board meeting at which the Board decided to seek a report on the proposed soil shed in Beverley Park, the process which had taken place to allow this, the purpose of the proposed shed, whether consultation had taken place, the proposed size of the shed and why this shed needed to be in Beverley Park or whether there could be some alternative method of fertilisation of the bowling greens.

The report before the Board traversed in detail these matters.

In considering this issue, the Board had, at an earlier point in the meeting, heard submissions expressing reservations over the size and proposed location of the soil shed from the Englefield Residents' Association.

The Board **decided** that the Chairman and the Community Advocate arrange a meeting with representatives of the Englefield Residents' Association to discuss the matters raised by the Association and discussed by the Board.
