

## 20. CARAVAN/MOTOR CARAVAN DUMP POINTS

A joint report from the Waste Management and City Streets Units outlined a proposal to introduce three campervan dump points around the city for the disposal of effluent, one of which was on the east side of Tyrone Street in Belfast. The Traffic Engineer and Peter Heatherington from the NZ Motor Caravan Association attended to outline the proposal and to answer questions.

Members expressed concerns relating to traffic volumes and turning vehicles in Tyrone Street, signposting from the north to allow for traffic speeds coming off the motorway, and a consultation process.

The Board **resolved** that the matter lie on the table until other sites have been considered and consultation carried out with the Residents Association and the public.
