

## 7. CHRISTCHURCH ROAD SAFETY STRATEGY

A report from the Transportation Safety Engineer was submitted for members' information. The document "Safe Streets", containing strategies and actions to achieve goals under various target areas, was to be forwarded for adoption by the Council from the City Services Committee at the August meetings.

Myra Barry enquired as to why skateboards had not been included in the considerations.

The Board **decided** that the issues contained in the strategy be discussed at a meeting of a Committee of the Board established to discuss traffic matters (refer clause 21 of this report).
