

15. EDIBLE FRUIT AND NUT TREES ON PARKS

Further to the suggestion endorsed at the 30 June meeting, the Area Parks Officer reported as requested on preferred locations. It was advised that because of the run of wet weather, planting would be delayed until about September, when members would be advised. Robin Booth asked that a progress report on their success be provided at some future stage.

The Board **resolved** to confirm St Albans Park and Rutland Reserve as the two sites for the initial planting of edible fruit and nut trees.
