

21. RING ROAD REVIEW

The Transport Planning Engineer reported and attended to make a presentation on the western section of the Ring Road, in response to the request from the 17 June joint meeting with the Fendalton/Waimairi Community Board. The report recommended that a detailed study be carried out in the next financial year, identifying issues, deficiencies and appropriate solutions in detail.

The Board **resolved** that a Committee of the full Board be appointed to discuss the review before meeting with the Fendalton/Waimairi Community Board.
