

6. SALTAIRE STREET

The Area Engineer reported on the petition, as outlined in clause 2.2 of this report, requesting the closure of Saltaire Street and its reformation as a cul-de-sac. The Area Engineer advised that alternative traffic safety improvement works for the intersection would appropriately address the residents' concerns. The Board **decided:**

1. That the information be received.
2. That the petitioners be informed of the action to be taken in response to their request.
3. That should the consultation show that intersection works are a priority then they be considered at the 1999/2000 Capital Works budget meeting.
