

24. METROPOLITAN CHRISTCHURCH TRANSPORT STRATEGY

A metropolitan Christchurch transport strategy is being developed. This strategy process is the result of recent discussions on the formulation of the urban portion of the regional land transport strategy. Metropolitan Christchurch is considered

broadly the significant commuting catchment of Christchurch city, including generally Christchurch, Kaiapoi, Rangiora, the Lyttelton Harbour area, Lincoln and Rolleston. As part of the development of the strategy, a seminar will be held for all Councillors. The Committee agreed to the development of a metropolitan Christchurch transport strategy continuing along the lines of the brief circulated.
