

14. POLICY DEVELOPMENT FOR LEASES/LICENCES AND EASEMENTS OVER RESERVES AND COUNCIL OWNED OPEN SPACE LAND RR 9017

The Parks Unit's Team Leader Consents sought support from the Board for the development of a policy for the granting of leases/licences and easements over reserve and Council owned land.

Members noted that such a policy was separate to that previously considered regarding charging for the occupation of reserve land.

Having considered the report, it was **decided** as follows:

1. That the Board supports the development of a standard policy for the leasing, licencing and provision of easements over Reserves and Council owned Open Space Land to enable delegations to be exercised as requested by the Council.
2. That the Board agrees to assist and facilitate discussion within their communities, especially with local sports and community groups and other interested parties assisting them to become aware of the issues which need to be addressed in formulation of a policy for the granting of leases, licences and easements over reserve and open space land administered by the Council.
