

7. POLICY DEVELOPMENT FOR LEASES, LICENCES AND EASEMENTS OVER RESERVES AND COUNCIL-OWNED OPEN SPACE LAND

The Board received a report from the Parks Consent Team leader on the development of a draft standard leasing policy for public consultation.

The report was considered and received favourable support from the Board.

Whilst the report suggested a “standard policy”, the Board considered that ‘standard policies’ was more appropriate, dependent upon the status of the licensee. (By way of example, a lease involving a community group/trust would have different conditions to that of a sports club.)

The Board **agreed** that any community facilitation required, if identified through the public consultation process, would be undertaken through its Environmental Committee.
