

15. NORTH PAPANUI LOCAL AREA TRAFFIC MANAGEMENT SCHEME

The Area Engineer reported seeking ratification of the North Papanui Local Area Traffic Management Scheme. The draft scheme was circulated for public comment as recommended at the September 1998 meeting. Submissions received would form the basis for consideration of the types of works most suitable to provide for all the road users in those areas. Alterations to the Scheme were advised, which separate the Local Road LATMS priorities from the Main Road Systems priorities.

The Board **decided**:

1. That the North Papanui Local Area Traffic Management Scheme be adopted in principle, recognising that its progressive implementation will involve Board assessment, along with the need for Council budget provision for implementing the individual components of the Scheme.
2. That another public meeting be held to explain the LATMS and to receive further comment and that a Working Party be established to examine the issues in more detail.
3. That a 'Watch for Children' sign be erected in Hoani Street as requested by the residents and the kohanga reo.
