

Officer responsible Community Advocate, Beckenham	Writer A Cosson, Community Technical Adviser
Corporate Plan Output: Solid Waste	

The purpose of this report is to present an application from residents of Oakview Lane for rubbish collection from a private lane. Permission is required before collection can begin.

Oakview Lane meets the entire structural requirement for collection. Signed permission has been received from 16 property owners. Two property owners have not responded to letters from the Beckenham Service Centre. No houses have been built on these two properties to date.

The application for collection was submitted on 27 October 1998.

Peter Falconer of the Waste Management Unit has recommended that if the Council approves the collection, and the two property owners who have not replied object at a later date, then collection could be cancelled.

At present if any property owner in a private lane, whose collection is already taking place, objects to the Council collecting, then collection is cancelled for the whole lane.

Recommendation: That the Council approve the commencement of rubbish collection in Oakview Lane.
