

6. DRAFT OUT OF SCHOOL PROGRAMMES

The Committee considered a draft Out Of School Programmes policy document, prepared by the out of school internal staff group, as a starting point for discussion with Community Boards, programme and service providers and advocacy teams. The policy was intended to define the roles of Council and Community Boards in programme services, and to provide a framework against which activities and strategies could be planned, reviewed and priorities established.

It was agreed that the document be endorsed as a basis for consultation with interested parties, including Community Boards, and members were requested to provide any additional further feedback direct to Louise Birkett of the internal staff group.
