

**9. LEASE OF AIRSPACE OVER PUBLIC ROADS**

RR 9976

The report of the Senior Planner (Planning Projects) detailed the issues involved in leasing airspace over public streets and the principles upon which a Council policy on the matter should be based.

The report was accompanied by a map defining the requirements which would apply to different streets in the central city.

The Committee **decided** that the report would form the basis for the development of a policy for the leasing of airspace and building over public roads
