

## 1. PETITIONS

RR 9381

### 1.1 CHRISTIAN STREET

A petition was **received** from 18 residents in Christian Street on matters relating to vehicle speed and general safety in the street.

Staff are to investigate the matters raised including organising speed and vehicle counts and a report is to be made back to the Board in May.

### 1.2 RHODES STREET

A report was considered setting out the results of a survey of existing traffic patterns in Rhodes Street and possible actions in response to an earlier petition from residents requesting that the street be made into a cul-de-sac at its intersection with Helmores Lane.

The report highlighted three options, two of which involved capital expenditure not currently allowed for in the 5 year capital works programme. The earliest any capital work could be done without substituting for existing work in the Board's area was in 2004/05.

Having considered the options identified, the Board **decided** that the request from the petitioners along with the officer's report be deferred and reviewed along with other project proposals later in the year.
