

**14. BROOKLANDS WATER PUMPING STATION
CHANGE OF PURPOSE OF A RESERVE**

RR 9440

The Parks Manager and Water Services Manager reported jointly seeking approval to change the classification of the land on which the Brooklands water pumping station is situated.

The land is vested in the Council and had been held as a local purpose (road) reserve. As part of the site is used for a Water Pumping Station it was inappropriate to continue to hold the reserve for roading purposes. The staff report recommended that to reflect the present land use the classification should be changed so that the area of the reserve occupied by the pumping station is held for a utility purpose and the balance classified as recreation reserve.

The Committee **resolved:**

Pursuant to Sections 24 and 24A of the Reserves Act 1977, the Parks and Recreation Committee of the Christchurch City Council hereby resolves to change the classification of the part reserve described in the first schedule from local purpose (road) reserve to recreation reserve and to change the purpose of the part reserve described in the second schedule from local purpose (road) to local purpose (utility) reserve.

First Schedule

Part lot 134 DP 6134 comprising 1144 m² or thereabouts being part of the land contained in Certificate of Title 333/70 Canterbury Registry and situated at 1001 Lower Styx Road, Brooklands, Christchurch shown as parcels B and C on S3109.

Second Schedule

Part lot 134 DP 6134 comprising 500m² or thereabouts being part of the land contained in Certificate of Title 333/70 Canterbury Registry and situated at 1001 Lower Styx Road, Brooklands, Christchurch shown as parcel A on S3109.
