

5. **CROSS BOUNDARY SUPPLY TO CITY USERS FROM THE PAPARUA STOCK WATER RACE SYSTEM**

The Water Services Manager provided an extensive report giving an update on the administration of the Paparua stock water race system.

A substantial area of rural land within Christchurch City receives a cross-boundary supply of race water from Selwyn District. The scheme is administered and maintained by the Selwyn District Council with Christchurch users charged directly.

Representation of city interests is achieved through membership of Mike Mora (Riccarton/Wigram Community Board) on the water race sub-committee, with Derek Rid (Water Services Unit) providing technical support.

A consultants 'overview' of the scheme was reported upon.

In view of the importance of this scheme, the Board **decided**, in conjunction with the Fendalton/Waimairi Community Board, to hold a seminar meeting on Monday 22 March to receive a full presentation.
