

2. REFUSE STATIONS

RR 9818

The Subcommittee received a report on the status of refuse stations in the area. It is now opportune for participating territorial authorities to review the refuse station situation in general, and to discuss what action may be prudent in order to prepare for future developments.

The Subcommittee **decided** that the staff of councils participating in the regional landfill project continue discussions on relevant refuse station issues to ensure all necessary modification and construction work is on target for the opening of the new landfill, and report back to a subsequent meeting on progress made.
