

19. NEWALL AVENUE – REQUEST FOR TRAFFIC CALMING

RR 9755

The Area Engineer outlined in a report the results of an investigation undertaken into a number of traffic related issues raised earlier by residents in the Newall Avenue vicinity.

The overall results of the research revealed that traffic speed and the use of the street as a shortcut were not a problem and as such traffic calming could not be justified.

Based on the report submitted, the Board **resolved** that traffic calming not take place in Newall Avenue and that this decision be notified to the residents.
