

## 7. **SOLID AND HAZARDOUS WASTE MANAGEMENT – CO-ORDINATED APPROACH BY LOCAL AUTHORITIES**

A report by Dr Mike Freeman and Andrea Lobb, Canterbury Regional Council officers, provided information from the recent Regional Council workshop on solid and hazardous waste management, including:

- The relationship of the Canterbury Regional Council with the joint local authority committee (Canterbury Joint Standing Committee)
- The preferred option for continuing and formalising existing co-operation of the Canterbury Regional Council with territorial local authorities through the Canterbury Joint Standing Committee.

The Committee **decided** that the Joint Working Party on Waste Management be asked to submit draft terms of reference for the Working Party on the management of hazardous wastes for agreement by Canterbury Waste Subcommittee and Canterbury Regional Council.

It was noted that the Regional Council would need to obtain feedback from territorial local authorities on the preferred model.
