

17. CYCLE NETWORK IMPLEMENTATION PRIORITIES

RR 10560

The Committee considered a report prepared by the Cycle Planning Officer which enabled members to consider the priorities proposed in developing the cycle network implementation plan. It was noted that the Cycle Planning Officer has initiated a research report on various cycle lane demarcation and safety techniques which will be available in due course.

The Committee **decided** that, taking into account the comments of the Committee on the priority setting process, an amended report be submitted for consideration at the October meeting.
