

**23. METROPOLITAN CHRISTCHURCH TRANSPORT STRATEGY -
UPDATE**

RR 10563

The Committee considered a report from the Senior Transport Planner which provided information on the progress of the Metropolitan Christchurch Transport Strategy and the current Regional Land Transport Strategy review.

It was noted the last report to the Committee on this matter in May 1999, outlined the background work of the study completed to that time, the structure of the strategy documentation and the draft Vision from the Canterbury Dialogues Transport Vision Group. The Committee adopted the Vision (with minor modifications). The Canterbury Dialogues Transport Vision Group has since then also produced a small brochure covering the Vision and the background of the group.

The information was **received**.
