

10. REFUSE TRAILER – SORTING PROPOSALS

RR 10853

The Committee considered a report which outlined the actions underway to introduce “trailer weighing and sorting” at the Council’s refuse stations. This would assist waste minimisation proposals by encouraging refuse to be sorted and recycled through the Resource Recovery Centres, rather than going into the landfill, ie items separated will reduce the cost to the public as the refuse will be weighed by the trailer load.

The Committee **decided** that the Waste Management Unit be authorised to continue to investigate an enhanced system for charging for trailers and private vehicles.
