

19. RING ROAD REVIEW

RR 10327

This report was submitted in response to the 17 June 1999 request of the Joint Fendalton/Waimairi and Shirley/Papanui Community Boards, *“that a report be prepared giving an indication of the timeframe for undertaking a complete review of the Ring Road and its associated intersections including Greers/Northcote/Sawyers Arms Roads and Greers/Harewood Roads intersections”*.

The report also further addressed the Annual Plan submission of the Fendalton/Waimairi Community Board, *“that the Council undertake an early review in consideration of alternative options to the use of the existing western leg of the Council’s ring road system”*.

The Committee **decided**:

1. That a review of all the city’s ring road systems be undertaken as part of the Christchurch Metropolitan Transport Strategy component of the Regional Land Transport Strategy Review currently under preparation.
2. That cost effective traffic management measures, including flush medians, cycle facilities, pedestrian islands, and parking restrictions, be implemented to address safety concerns on the north-west and other sections of the ring road route.
