

7. PARKING FACILITY IN PAPANUI

In response to a request by the Chairperson, the Area Engineer reported, highlighting again the need for provision of some form of off-street parking facility in the Papanui business area. Preparation of an analysis of the need for such a facility would be necessary.

The Board **decided:**

1. That the Papanui Business Zone be included in the consultation and study processes for the parking strategy report that is currently being prepared for the Council.
2. That a report be prepared for the Board outlining what effective measures may be pursued to alleviate the growing kerbside parking problems.
