

### **13. GROYNES RECREATIONAL WATER QUALITY RESULTS**

Figures giving the water quality results for the 1999/2000 summer at the Groynes Reserve were supplied by the Project Leader, Canterbury Regional Council. Members were interested to know if the tests had been carried out at the same sites as last year, this being a factor in the results.

The Board **decided**:

1. That the information be received.
2. That the Canterbury Regional Council be asked to report in detail about safe swimming standards, the trending of the results and what measures were being taken to improve water quality.
3. That the results be referred to the Parks and Recreation Committee.
