

19. MAIREHAU ROAD/TRAVIS WETLAND LAND DISTURBANCE AND EXCAVATION INTRUSION

The Community Secretary reported on events that led to the levelling of a sand dune in Travis Wetland and provided mechanisms to prevent an incident of this nature occurring in the future. The Board **decided** to recommend to the Parks and Recreation Committee:

1. That the information be received.
2. That an assurance be sought from the City Streets Unit that the contractor will undertake replanting and ongoing care during establishment of the dune area to the satisfaction of the Parks Manager; or that the contractor make restitution to allow the replanting and maintenance to be undertaken by the Travis Wetland Trust.
