

#### 4. MEMORIAL AVENUE LANE MARKINGS

In a report from the Traffic Engineer, the Board was invited to forward to the City Services Committee any comments on the proposed plan to improve traffic management along the section of Memorial Avenue between the Russley Road and Orchard Road roundabouts.

Key features of the proposal included the removal of kerbside parking, the provision of cycle lanes and the planting of the existing berm areas as part of the Board initiated millennium project.

It was **decided** that the City Services Committee be advised that the Board supports the proposed plan and notes the limited responses received in opposition to the proposal.
