

#### 4. RECREATION AND SPORT STRATEGY

The Leisure Manager presented a discussion document on a proposed recreation and sport strategy for Christchurch as an issue raising exercise. Members commented favourably on the scope, straightforward language and presentation of the document. Suggestions were made of local groups who might be interested in having input in the strategy and it was pointed out that the needs of Asian people were sometimes overlooked in the area of non-competitive recreation. The Board **received** the information and members were invited to provide any further feedback direct to the report's author.
