

31. KENWYN AVENUE OAK TREES

The Committee considered a report from Mr Walter Fielding-Cotterell on the complaints which had been received by the Parks Unit from residents in Kenwyn Avenue about the large oak street trees situated at the south end of the avenue.

The complaints related mainly to problems caused by leaf and twig deposits littering the street and private properties.

The Committee **resolved** that the recommendation in the report, that the oak trees be retained, be adopted.
