

6. FENDALTON ROAD DESIGN

Prior to presentation to the February meeting of the City Services Committee, the Board was provided with the contents of a report setting out the design process for the reconstruction of the road and a request made to indicate to the Committee its preference as to the width of the central median. This invitation to comment followed the combined presentation to the Committee and Board held on 26 November and the joint site visit undertaken on 9 December.

An option to provide centrally located planting plots along with a painted median was proposed but not supported by the majority of members present.

The Board **decided** to endorse the proposal for the construction of a 3.4 metre wide median for recommending to the City Services Committee.

Note: Mr Wright asked for his vote to be recorded against the above decision.
