

3. NOTABLE TREE SURVEY

The Board considered a report setting out the outcome of the Section 32 analysis relating to the protection of additional trees in the Fendalton/Merivale area along with some options to assist the Board in deciding whether or not to seek support for promoting a variation to the City Plan.

The Board **decided** that while acknowledging that there could be difficulties in achieving completion of the variations, the Board nevertheless requested that the Resource Management Committee and the Council endorse the importance of the retention of significant trees in the City by initiating an appropriate Variation together with the fourteen already approved by the Council.
