

9. 1999/00 ROADING PROGRAMME

The City Streets Manager provided a progress report on the major roading works being undertaken within the Board area.

Seven major works, with a value of \$2 million were identified and reported on.

It was noted that comments in respect of the Rimu Street traffic restraint, at the Service Lane, was not deferred (as had been stated in the report), but still required further deliberation by the Board, through its Works and Traffic Committee.

The Board **received** the information.
