

32. CROFTON ROAD - SILVER BIRCH TREES

The Committee received the report of the Subcommittee appointed at the June meeting of the City Services Committee to consider the request from residents in Crofton Road that the existing silver birch trees be removed and replaced with smaller growing species.

The Committee consisting of Councillors Denis O'Rourke, Carole Evans and Ron Wright and the Chairman of the Fendalton/Waimairi Community Board had met on site on Thursday 29 June to view the trees and supported the original recommendation of the Fendalton/Waimairi Community Board that the residents' request be declined.

The Committee **resolved** that the existing trees in Crofton Road be retained with the exception of three silver birch trees and one eucalyptus which should be removed in the near future.
